## CADET OFFICERS ARE ANNOUNCED

### Clemson's New Building Program Makes Rapid Progress

## Blue Key Proposes New Freshman Regulations

Seniors To Act As Advisers  
To Members of Freshman Class

In an effort to better the freshmen system now existing at Clemson, members of the local chapter of Blue Key, national honorary leadership fraternity, have compiled a new system which has met with the approval of leading college officials and which will be submitted for the approval of the senior class in September.

The plan decided upon does not alter any of the rules now existing, but is designed to supplement existing systems and make them function more smoothly. No attempt to stop hazing has been proposed, but certain regulations tend to insure that freshmen and upperclassmen live up to their obligations to each other and to the college with a minimum of friction. With the whole-hearted

(Continued on page three)

## SUMMER ACTIVITIES BRING LARGE CROWDS

Throngs Arrive on Campus To Attend Many Summer Meetings

Even before the graduating seniors had received their diplomas at Clemson last June, summer activities on the campus were beginning to get under way.

On June 1st through 4th a group of more than a hundred vocational agricultural teachers and students gathered here for a four-day conference of their problems during the past year and to discuss plans for the next school session.

On June 2nd 450 members of the South Carolina Association of Future Farmers of America met here for a three-day convention that included judging contests, public speaking competitions, and a general business session of the organization.

June 7th saw the opening of Clemson's 1937 summer school under the direction of Mr. W. H. Washington, Dean of the Summer School. More than 300 students attended the school this summer.

(Continued on page two)

## WILLIAMS TEACHES RURAL SOCIOLOGY

B. O. Williams, Professor of Rural Sociology and Statistics in the Department of Agricultural Economics, has returned to Clemson after having taught a course in Rural Sociology in the University of Kentucky Summer School, Lexington, Kentucky, during the first summer session. The course was one of a series especially designed to offer graduate credit to county agents, teachers of agriculture, and other graduate students

### BLUE KEY PREXY

A. E. Stalvey of Conway, who was recently elected president of the Clemson Chapter of Blue Key, national honorary leadership and service fraternity for the coming school year.

## Library Undergoes Complete Change

Five New Rooms Provided As Result Of Extensive Remodeling

As a part of the general building program, the Clemson college library has undergone complete renovation during the summer months. All rooms have been done over, and five new rooms have been created as a result of the remodeling.

According to plans announced by Miss Cornelia Graham, college librarian, there will be a new browsing room containing current periodicals and attractive editions of the better-known literature. The reference books which have long crowded the main room will be put into a separate room, designed and furnished particularly for reference work. There is a new cataloging room which will greatly facilitate the cataloging of volumes on hand, and there has been created a Carolinian Room containing historical volumes on anything pertaining to South Carolina, particularly the fields of engineering and agriculture. The room is being created primarily for the benefit of professors and students who desire to do extensive research work along these lines. Due to the crowding of the agriculture reference department, an extension room has been designed. This room will be second and third files. The education department has turned over 800 special books to augment these files.

## NEW TEXTILE PLANT TO BE CONSTRUCTED WITHIN NEAR FUTURE

Additions To The Chemistry And Library Buildings Now Underway

### SPRINKLERS INSTALLED

As the summer months wear away and another school session looms before Clemson College, the college buildings themselves are being put in readiness to accommodate approximately 1700 cadets who will enroll here in September.

Outstanding in the building and remodeling program, but not to be in readiness this fall is the new \$300,000 textile building that is to be begun in the near future. Designed to fill all requirements of a modern school of textiles, Clemson's new textile building will follow the general plan of the buildings recently erected on the campus. In outside appearances it will conform with Riggs Hall, the school of Engineering, and Long Hall, the school of Agriculture.

Prominent also is the addition to the Chemistry Building, a long-felt need at Clemson. A large wing, 35 by 80 feet, will be added to the south end of the present Chemistry building and will provide chemical laboratories and classrooms as well as additional laboratory equipment. This addition will increase greatly Clemson's facilities for instruction in general chemistry.

The work on the Administration building has included the installation of a sprinkler system and the remodeling of six classrooms. A sprinkler system identical to the one placed in the Administration building has been installed in barracks No. 1, 2 and 3, thereby insuring the living quarters against fire loss.

With the transferring of all agricultural work from the Library Building to the new Agricultural Hall, an enlargement of the Library was made possible. The past month workmen have been busy removing partitions and expanding the Library reading room.

(Continued on page two)

### BRIGADE COMMANDER

F. L. Bell of Lancaster, S. C., who will serve as Commander of Clemson's Brigade for the 1937-38 session.

## Holtzendorff Gets Funds For Building

YMCA Board Gets Access To \$20,000 To Remodel Theatre

Working through the medium of a board composed of Dr. E. W. Sikes, Mr. J. C. Littlejohn, Dean S. B. Earle, Professor R. E. Lee, and Mr. P. B. Holtzendorff, the YMCA Board has been granted authority from the Board of Trustees to borrow a sum of \$20,000 to enlarge the present building.

Negotiations for the loan are being handled by Mr. S. W. Evans, college treasurer, and all funds, gifts and contributions will be under his supervision. It is understood that a nearby bank has agreed to furnish the bulk of the needed capital. This fund is to be used to bring about a much needed increase in the seating capacity of the Y theater and to improve the building in general.

## Roving Reporter Relates Account Of Growth Of College Metropolis

By W. R. Cheves

Confined to the college premises for an additional, unexpected three weeks working on the summer "rag", we decided on a tour of inspection the other P. M. to see just what was going on in the outer world. Strolling down the main drag, we found that an old Clemson landmark will be missing in the future—Gone is "Scotty" and his messery. Gone, also, is Clemson's "Hall of Fame" with its pictures and records of Bengal stars in the halycon days when Pressley, Justus, Jones, Banks, and other gladiators roamed the hills. In its place now reposes a new short order emporium with the latest in everything.

Venturing on down the thoroughfare, we caught Judge Keller carting some of his merchandise from his temporary hide-out into his modern brick palace located in the heart of Clemson's fast-growing metropolis.

In column of twos, we retraced our steps and turned off in the direction of the field house where we discovered a bit of news that will find its way into the tennis-lover's heart. Six of the courts have been graded and should be ready for service in the fall. Satisfied that work had begun on the Chemistry annex, but not being able to find evidences of construction on either the Textile Plant or Post Office, (Continued on page eleven)

## Bell To Head '37 Brigade At Clemson

Bell Is Brigade Commander; Farmer Is Named As Brigade Executive

According to information released by the local Military Department last week, the following assignments of Cadet Field Officers for the school year 1937-38 is announced:

Colonels—Bell, F. L., Brigade Commander; Farmer, R. J., Brigade Executive; Cheves, W. R., First Regiment Commander; Stafford, T. I., Second Regiment Commander.

Lieutenant Colonels—Stalvey, A. E., First Regiment Executive; Jordan, B. S., Second Regiment Executive; Fuller, E. H., Commanding 1st Bn., 1st Reg.; Denny, R. M., Commanding 2nd Bn., 1st Reg.; Taylor, A. W., Commanding 1st Bn., 2nd Reg. Skardon, B. N., Commanding 2nd Bn., 2nd Reg.

### Promotions

By direction of the President (Continued on page twelve)

## GRADUATES OF 1937 SECURE JOBS AT ONCE

Ninety Per Cent Placed By July 1; Seventy Per cent Secure Jobs Before Graduation

Before the members of the graduating class had been awarded their diplomas, seventy per cent had been employed as a result of the demands of industrial concerns, agricultural enterprises, scientific laboratories, and educational institutions. By July 1, when the occupational list of graduates was prepared, ninety per cent had secured good positions; and the college anticipates the placement of every member of this year's class by the middle of August.

As early as April of this year, several members of the 1937 class had had as many as four or five offers from various prospective employers. By the close of the session in June, more than half (Continued on page two)

## FULMER HOME FROM CORNELL UNIVERSITY

Professor J. L. Fulmer of the Agricultural Economics Department, has returned from Cornell University where he received the M. S. degree under the chairmanship of the eminent Agricultural Economist, Dr. George F. Warren. Professor Fulmer's thesis was entitled "A Statistical Study of Agricultural and Related Trends in South Carolina." Substance of the thesis will be published in a bulletin

## NINETY PER CENT OF GRADUATES OF 1937 ARE SUCCESSFULLY PLACED BEFORE JULY

(Continued from page one)

of the departments of the college had placed one hundred per cent of their men, and many others had placed all but one or two graduates.

The members of the 1937 class have scattered over fourteen states. They are to be found in North Carolina, Tennessee, Georgia, Florida, Virginia, Louisiana, Texas, Wisconsin, Ohio, Pennsylvania, New York, Connecticut, and Massachusetts, while the majority have remained in South Carolina. The jobs secured, as listed below, are typical of the positions for which Clemson prepares its students:

D. L. Farr has a position as a Chemist with the E. I. DuPont de Nemours and Company Laboratories in Philadelphia.

R. G. E. Steever is with the General Electric Company in Pittsfield, Massachusetts.

H. S. Ashmore is a reporter on the Greenville Piedmont staff.

W. H. Ballard, L. L. Bowen, F. F. Finley, and D. G. Price have secured employment in the Burlington Mills of High Point and Statesville, N. C.

J. E. Ponder will teach Agriculture in the Mauldin public schools.

W. T. McClure is an Agent for the U. S. Department of Agriculture. He is located at Clemson where he is engaged in work with cotton.

R. B. Wearn has secured employment as a Chemist with the National Adhesive Corporation in Philadelphia, Pennsylvania.

N. M. Jackson, R. C. Maness, and L. A. Perry have work in the Bridge Department of the State Highway Department.

J. N. Berry plans to teach and coach in Johnston.

W. H. Cutts, C. C. Frye, and A. C. Patterson, Jr. are working with the Marshall-Field Company in Spray, North Carolina.

J. H. Cannon will teach Industrial Education in McColl.

O. H. Folk is working during the summer at the Virginia Polytechnic Institute. In September he will go to the University of Virginia where he has been awarded a fellowship in Agricultural Economics.

C. S. McCallum has been appointed Director of Agriculture in Brevard College, Brevard, N. C.

F. H. Lewis has secured a fellowship in plant pathology at Cornell University. Mr. Lewis' particular field in pathology will be diseases of tree fruits. He will do working leading to the Ph.D. degree.

W. A. Speer is a flying cadet in the U. S. Air Corps and is stationed at Randolph Field in Texas.

J. T. Rhoden has secured a position with the Edgefield Cotton Mill.

J. R. Windell will teach Industrial Education at Aiken.

E. A. P. McCarthy, Jr., has secured a commission as a second lieutenant in the U. S. Army. He will be located at Fort Scriven, Georgia.

R. S. Campbell is connected with the Campbell Limestone Company in Knoxville, Tennessee.

L. S. Cloaninger will teach Agriculture in Brooklet, Georgia.

J. J. Moorhead has accepted an appointment as second lieutenant in the U. S. Army and is stationed at Fort McPherson, Atlanta, Georgia.

J. S. Hunter has secured work with the General Electric Company and is located in Philadelphia.

J. W. Jones, who was awarded the Anderson Fellowship, will take graduate work in soil science probably at Cornell University.

R. A. Carter is a Special Agent of the New York Life Insurance Company with his headquarters in Spartanburg.

C. N. Calhoun plans to work for his Master's degree at Louisiana State University.

G. E. Bryan is farming in Alendale.

S. J. Seigler is at present in Anderson where he is working on a special Tax Delinquency Study.

B. N. Gilmore is employed by the C. G. Fuller Construction Company with offices at Wrightsville Beach, N. C. and Hollywood,

J. H. Green is with the Georgia Power Company and is located in Atlanta, Ga.

H. P. Bacot is a Flying Cadet in the U. S. Air Corps and is stationed at Randolph Field in San Antonio, Texas.

J. W. Rion will teach in the Calhoun-Clemson high school.

M. C. McKenzie has been employed by the Extension Service.

W. C. Breazeale and L. H. Burgess are working with the Soil Conservation Service in Spartanburg.

C. R. Swearingen, Jr., has secured employment with the Georgia-Carolina Dairies and is located in Augusta, Georgia.

J. H. Girardeau is at present working with the South Carolina Experiment Station at Clemson. In September he plans to pursue graduate work at Iowa State College.

E. L. Ryan is Assistant to the Manager of the South Carolina Peach Growers Association with headquarters in Spartanburg.

J. F. Dunlap is a Second Lieutenant in the U. S. Marine Corps.

M. I. Shuford is working with the Carolina Steel and Iron Company of Greensboro, N. C.

R. C. Sweeting has work with the P. W. A. in Charleston.

J. T. Mann is in the Meter Department of the Carolina Power Company in Raleigh, North Carolina.

S. J. Craig and E. P. Ward are working in New York City where they have been employed by the Ciba Company, Inc.

G. H. Collings, Jr. plans to enter the Medical School of Emory University.

R. M. Watson, Jr. is farming at his home in Ridge Springs.

R. E. Hilton has work in the Winnsboro Mills.

Gordon F. Rogers is in Miami, where he is working in the laboratories of the Pan American Airways.

L. A. Williams is in the contracting business in Charleston.

A. W. LaGrone is with the Kendall Company at Paw Creek, N. C.

J. B. Wall has secured employment with the Bibb Manufacturing Company of Macon, Ga.

W. H. Gibson will teach Vocational Agriculture in Girard, Ga.

H. A. Wood, Jr., plans to teach Industrial Education at Moncks Corner.

W. K. Lewis, Jr. has secured employment in the Sonoco Products Company of Hartsville.

G. M. Taylor is working with the Gossett Mills of Anderson.

W. L. Cheatham is employed in the Sales Department of the Southern Cotton Oil Company and is located in Norfolk, Virginia.

W. R. English is a Flying Cadet of the U. S. Air Corps and is being trained at Randolph Field in Texas.

P. M. Buckner is in Racine, Wisconsin where he is taking a two months course with the J. I. Case Company.

F. B. Smith is farming in Johnston.

D. T. Redfearn is a Farm Economist with the Ware Shoals Manufacturing Company.

M. P. Howell is farming in Walterboro.

E. H. Floyd is working with the Louisiana Experiment Station at Baton Rouge. He plans to pursue graduate work at Louisiana State University.

G. M. Nichols will serve as a Graduate Assistant in Chemistry at Clemson College for the session 1937-38.

D. B. Stone has employment as a Chemist with the American Agricultural Company with his headquarters in Columbia.

J. E. Cobb is working in the Judson Mills in Greenville.

L. A. Edwards is operating his own woodworking plant in Highlands, N. C.

W. H. Bertram, Jr., is working as an Engineer with the Portland Cement Association and is living in Long Island City, N. Y.

J. E. Muldrow is in the Naval Reserve Air Corps in Opa Locka, Florida.

S. L. McCleskey, Jr., is employed by the Public Utilities Company of Orangeburg.

F. C. Mintz is in Electrical

## CLEMSON'S BATTALION COMMANDERS

Commanding Clemson's four Battalions during the 1937-38 session will be E. H. Fuller, Columbia, (upper left) who will command the First Battalion First Regiment; R. M. Denny of Graniteville, (upper right) who will command the Second Battalion, First Regiment; A. W. Taylor of Charleston, (lower right) who will head the First Battalion, Second Regiment; and B. N. Skardon of Walterboro who will head the Second Battalion, Second Regiment.

Engineering work in East Haven Connecticut.

W. Folk, Jr. and E. S. F. Giles are with the Westinghouse Electric and Manufacturing Company in Pittsburg, Pennsylvania.

R. L. Geisberg is working with Babcock and Wilcox Company in Barborton, Ohio.

B. H. Camp has secured work in the Pacific Mills at Lyman, S. C.

L. M. Calhoun and H. D. Leitner are employed by J. E. Sirrine and Company of Greenville.

B. D. Cain, Jr. is in Macon, Georgia, where he has work with the Bibb Manufacturing Company.

J. D. Cooley has accepted a position to teach Vocational Agriculture in Waco, N. C.

R. N. Gambrell will teach Vocational Agriculture in Cades.

R. D. Adams is working as a Salesman in Seneca.

W. M. Gordon is acting as Life Guard at the Y. M. C. A. pool in Ware Shoals. Later he plans to enter Emory University and pursue further work.

W. A. Lawton is serving as Special Agent with the New York Life Insurance Company.

H. D. Lewis is in Mullins where he is engaged in the tobacco business.

N. C. McCorkle, Jr., is employed by the Southern Bell Telephone Company in Greenville.

L. E. Mays plans to enter the Medical College in Charleston in September.

G. C. Warren, Jr. plans to pursue graduate work at the University of Wisconsin.

W. M. Allison is working with the Erlanger Cotton Mill in Lexington, N. C.

C. O. Browning is employed by the Greenwood Cotton Mills.

W. B. Ezell has been employed as a teacher of Agriculture in the Ninety Six public schools.

H. W. LeMaster will enter the Atlanta Southern Dental College in the fall. At present he is in Gaffney.

Rodman Lemon is working with the C. G. Fuller Company of Barnwell.

O. W. Leonard, Jr. has secured his commission as a Second Lieutenant and is stationed at Fort McPherson, Ga.

C. G. White, Jr., plans to enter the Emory University Medical School.

L. C. King has been elected to teach Agriculture in the Olanta School in Florence County.

R. C. Glanton has secured a commission as Second Lieutenant and is stationed at Fort McPherson, Georgia.

J. T. Reames is working with the Palmetto Farm Supply Company in Columbia, S. C.

B. T. Lanham, Jr., is employed as a Research Assistant by the South Carolina Experiment Station during the summer months. He hopes to pursue graduate work in Agricultural Economics at the University of Maryland.

W. M. Epps has secured a fellowship in Plant Breeding at Cornell University.

J. M. Jeter is located in Union where he is in partnership with his father.

E. B. Baskin is doing assistant county agent work in Kings-tree.

E. C. Heikkila is a Chemist with L. Sonneborn Sons, Inc., in New York City.

J. B. Floyd is working as a surveyor in Manning.

L. A. Gambill is working in the Materials Testing Laboratory of the State Highway Department in Columbia.

Edward Heap is a Chemist with the Barrett Company in J. L. Cox has secured work with the Georgia Power Company and is located in Atlanta, Georgia.

R. E. LeRoy is in Schenectady, N. Y., where he is working with the General Electric Company.

H. F. Sander is working for the Pennsylvania Bell Telephone Company and has headquarters in Philadelphia, Pennsylvania.

W. E. Mullinax will teach in the Junior High School of Anderson.

R. M. McAdams has accepted a position as teacher of Industrial Education in the School for the Deaf at Monganton, N. C.

H. K. Segars is farming in partnership with his father at Hartsville.

J. F. Norris is with the Reinhold Ice Cream Company of Miami, Florida.

H. S. Price is a Chemist with the Barrett Company of Columbia.

J. C. McWhorter is working for the Soil Conservation Service at present. Later he plans to enter Texas A. and M. College to pursue graduate work.

## BUILDING PROGRAM IS OF EXTENSIVE NATURE

(Continued from page one)

ing room to include those rooms that were formerly used as laboratory and teaching space by the Agricultural department.

Although an announcement has been made from the treasury department in Washington to the effect that a new \$90,000 Post Office building has been approved for Clemson, a site for this structure has not been definitely decided upon and no announcement as to when work will begin has been made.

Moved from the location that is now occupied by the four new barracks that were erected here last year, the Clemson tennis courts are being reconstructed behind the field house. Six well-planned and well graded courts are being prepared by the Athletic Association. Every effort will be made to complete these courts before the formal opening of the college session in mid-September.

## CLEMSON'S SUMMER PROGRAM CONTINUED

(Continued from page one)

A feature part of the summer school program consisted of the cotton classing course.

On July 15th more than one hundred delegates from all sections of the state attended a meeting of the South Carolina Society of Engineers that was held here under the supervision of Dean S. B. Earle, head of the Clemson school of engineering.

During the latter part of July and first of August Clemson will be the site of a Four-H club encampment for boys and girls of South Carolina who are members of this organization. These groups rotate each summer, some visiting the camp at Clemson, while others visit Rocky Bottom, S. C., and Camp Long, at Aiken.

The period July 24th through August 21st was turned over to the seventeenth annual college vacation summer school for workers. This summer school, more generally known as Opportunity School is being attended by approximately 300 students and is under the direction of Miss Wil Lou Grey, state supervisor of adult education.

L. M. Acker is in Anderson and has work in the Gossett Mill.

F. O. Griggs is working for the Cannon Mills in Kannapolis, N. C.

W. M. Rodgers, Jr., is working for the General Electric Company and is stationed in Philadelphia.

T. A. Stallworth has been elected teacher of Vocational Agriculture in North, South Carolina.

C. P. Quattlebaum is working with C. M. Guest Construction Company of Anderson and at present is located in North Carolina.

C. D. Hopkins is in West Lynn, Massachusetts, where he is employed by the General Electric Company.

J. M. Bennett is Chemist with the Ware Shoals Manufacturing Company.

S. R. Clark is with Westinghouse and Company in East Pittsburgh, Pennsylvania.

L. G. Kelly will teach Industrial Education at Honea Path.

E. D. Wells, Jr. is planning to enter medical school in September.

T. F. McNamara is working in the Southern Bleachery in Taylors.

H. W. Smith has secured work with the Tennessee Eastman Corporation and is located in Kingsport, Tennessee.

J. M. Neuffer is working with the Burlington Mills in Statesville, N. C.

W. L. Nelms is in New York City where he is connected with the General Electric Company.

C. B. Little has secured work in the Dunean Mills in Greenville.

A. P. McPeters is working with the Callaway Mills in LaGrange, Georgia.

J. T. Johnson is connected with the Abbott Machine Company in Greenville.

## SEARS-ROEBUCK OFFERS FUND TO AGRICULTURAL STUDENTS

**Twenty-five Farm Boys To Receive Help Through Scholarships**

### AWARDS ANNOUNCED

Through the generosity of the Farmers Market of Sears Roebuck & Company, Atlanta, Georgia, \$2500.00 was given the School of Agriculture to aid deserving farm boys who wished to study Agriculture at Clemson.

The donor requested that \$100 be given to each of twenty-five boys, the selection to be based on need and accomplishments.

A faculty committee composed of the Heads of each Department in the School of Agriculture formulated the following rules for awarding these scholarships:

1—Applicants must have completed their high school work and must meet the college requirements to enter the freshman class for the session 1937-38.

3—Applicants must be in the upper third of their graduating class.

3—They must have shown interest and achievement in agriculture through successful pursuit of projects in 4-H or F. F. A. Club work.

4—They must show the need of financial assistance.

5—Scholarships are to be awarded by competitive examination.

6—Four scholarships are to be awarded in each of the six congressional districts of the state and one in the state at large. If there are not sufficient applicants from any one district or if applicants fail to qualify either on the basis of scholarship or need, the scholarships for such districts will be transferred to other districts.

7—Alternates will be specified so that if any successful applicant fails to enter college his place will be taken by the next ranking contestant.

Announcement of the gift and rules governing the awards were sent out the first of April to all County Superintendents of Education, all Superintendents of High Schools, all County Agents and all Vocational Agricultural Teachers.

Ninety-eight applications for permission to take the competitive examination were received. The examination was held July 15th in seven different places in the state.

The Scholarship Committee has graded all examination papers and the following boys have been awarded scholarships:

#### State at Large

##### First Congressional District

R. J. Berry, Smoaks; E. F. Bennett, Smoaks; Pinckney Eve, Burton; G. W. Jones, Ruffin; W. H. McNair, Gable.

##### Second Congressional District

J. C. Culler, Wolfton; S. H. Garwood, Route 3, Sumter; J. J. Lever, Cayce; W. H. McCartha, Lexington.

##### Third Congressional District

D. H. Gambrell, Route 4, Seneca; L. C. Martin, R. F. D., Seneca; S. C. Morgan, R. F. D., Central; J. D. Sharpe, Route 2, Anderson.

##### Fourth Congressional District

J. F. Griffin, Route 4, Honea Path; H. L. Painter, Chesnee.

##### Fifth Congressional District

R. E. Horton, Pageland; F. M. Kreutzer, Winnsboro; R. G. McMaster, Winnsboro; E. Pate, Rte. 2, Camden; E. J. Rodman, Rodman.

##### Sixth Congressional District

C. J. Bethea, McColl; Z. T. Ford, Route 2, Nichols; J. E. Pace, Gresham; D. H. Rogers, Blenheim.

#### Alternates

##### (In Order of Rank)

R. E. Orr, Walhalla; E. P. Harguenin, Route 1, Ridgeland; T. H. Caldwell, Route 1, Ruffin; J. E. Weatherford, Pinopolis; E. P. Klugh, Route 4, Greenwood; C. D. Padgett, Saluda.

O. R. Huskey, '34, has recently received a promotion from the rank of second lieutenant to first lieutenant in the U. S. Army. He is stationed at Norris Dam, Tennessee.

### NEW CDA PRESIDENT

Otis Morgan of Laurens who is to head the Central Dance Association for the ensuing year has already begun negotiations to obtain the services of some of the country's leading orchestras. His active association with the C. D. A. in the past is indicative of his ability to well fill the position.

## President Explains Function Of Group

### Non-Profit Organization Obtains Better Bands At Lower Prices

In the fall of 1933 the cadet Corps of Clemson realized the need of a more centrally organized dance committee and set about to organize what turned out to be The Central Dance Association. Up until that time there had been a separate committee for each dance thus limiting their buying power. Under the new regime it was found possible to keep a reserve fund on hand with which to procure the services of larger orchestras.

Since nineteen thirty-three the organization has proved highly satisfactory for it has improved the Clemson dances in many ways. In the course of a year the Cadets enjoy some of the nation's finest dance music. In addition to obtaining these orchestras the Central Dance Association makes all arrangements relative to the care of the Cadet's dates while they are visiting at Clemson. Properly chaperoned sleeping quarters are at the service of the young ladies and a section of the mess hall is set aside for their use. Thus Clemson boasts the most satisfactory system of carrying out a week-end of dances for every thing is carefully planned and executed. At no other school do the students enjoy such an arrangement.

The 1936-37 season was very successful and achieved the very difficult task of pleasing a temperamental Cadet Corps. At the close of the year they decided that the association should be changed from a ten man committee to four executive members and six associate members. The executives include a chairman, an officer in charge of finance, an officer in charge of placing, and an officer in charge of decoration. The new members named in that order are Otis F. Morgan, A. R. Waters, Fred Dunlap and Tom E. Stanley. The associate members are D. B. Clayton, J. R. Ambrose, R. A. Sloan, J. W. McSwain, H. W. Boozer, and B. N. Skardon.

## STATE CONVENTION IS STAGED AT CLEMSON BY FUTURE FARMERS

**Over Five Hundred Girls and Boys Attend Training Courses**

During the first week in June the state convention of Future Farmers of America was held at Clemson. More than five hundred high school boys and teachers were here for this occasion.

Training in parliamentary practice, discussion of annual plans of work, recreation and contests were themes receiving special attention by this group. A tour of the campus was provided, and many of these young men expressed an interest in some day becoming students at Clemson College.

The Mountain View High School team won first place in the Fifteenth State-Wide Vocational Agricultural Students' Judging Contest held at Clemson College June 2. This team was coached by W. F. Moore and is composed of the following members: Hugh Chastain, J. W. Lindsay, and Jack Snipes. They were awarded a silver pitcher donated by T. W. Wood & Sons of Richmond, Va.

The Pickens High School team coached by R. A. Cole placed second.

Jack Snipes of the Mountain View High School scored the highest individual rating in the entire contest and was awarded a gold watch, contributed by the Barrett Company of New York City.

The Sumter High School team composed of Sam Garwood, C. B. Newman, and J. R. White, and coached by W. C. James, was high team in general livestock. This team will represent the State at the American Royal Livestock Show in Kansas City next fall.

The following teams won first places in other judging events as listed: Judging corn, Hickory Grove; judging oats, Mullins; judging horticultural products, Mullins; judging poultry, Ridge land; judging supervised practice programs, Camden. Appropriate prizes were awarded the winners.

High individuals in the various classes were as follows: Leon Gardner of Hickory Grove, corn; Adolphus Collins, Mullins, oats; Bryon Reed Bull of Cameron poultry and eggs; Jack Snipe of Mountain View, Jersey an Guernsey cows; Ben Rogers of Roebuck, Guernseys; Hugh Chastain of Mountain View, Jersey cows; Thomas Fowler of Wood ruff, peach trees; Wallace Goeth of Ridgeland, sweet potatoes; J. W. Lindsay of Mountain View Irish potatoes; C. B. Newman of Sumter, hogs and mules; Sam Garwood of Sumter, mules; Harvey Jones of Antioch, hogs; Leon Gardner of Hickory Grove, supervised practice.

## BLUE KEY PROPOSES PLAN TO PROMOTE STUDENT RELATIONS

### BUSINESS MANAGER

J. C. Littlejohn, who efficiently handles all important matters regarding the business and financial affairs at Clemson, is an honorary member of Blue Key, national leadership fraternity, and heartily endorses the contemplated Blue Key Relationship Plan for next year.

**Seniors To Be Advisers For Members Of Freshman Class**

### OFFICIALS APPROVE

(Continued from page one)

support of the senior class, the system shows promise of resulting in a better trained freshman class and more satisfaction for upperclassmen.

As yet there are several details and rough spots to be adjusted and ironed out; so only a brief outline of the proposed system can be given at this time. The entire plan will be thoroughly discussed and re-hashed at student meetings before it is put into effect.

Following is a brief outline of regulations incidental to the new system.

1—Aside from the regular details as is customary, the freshmen will be divided into details of several men. Each detail to be assigned to a senior.

2—Each senior shall be assigned a detail of freshmen and he will be known as their senior Advisor.

3—Each freshman shall be responsible to his senior adviser for his conduct, attitude, personal conduct and school record. Each senior in turn shall be responsible for the freshmen in his detail for the above mentioned phases.

4—Freshmen must notify their Senior Advisor at any time their names appear on the disciplinary sheet.

5—Each Senior shall be responsible that the freshmen of his detail conform to the freshman regulations.

6—Each Senior shall see that no freshman is required to do more than his share of duties but that each freshman does dispose of his share of the details placed upon him.

A complete set of the rules will be furnished some time later. The ones given are for the information of senior class members. President Stavley urges that each member read the plans carefully and formulate some opinion as to possible changes.

Included among the records is practically all of the great instrumental, vocal and operatic music of the last two hundred years. And by means of the reproducing and amplifying apparatus it is possible to reproduce the same volume of music one would hear at a concert where the orchestras or the singers could be seen as well as heard.

## Musical Concerts Sponsored Weekly

### Campus Folk Hear Open Air Broadcasts On Every Wednesday Evening

As listeners to the radio are aware, outdoor concerts are given by symphony orchestras in various large cities during the summer months. Of these, those given by the New York Philharmonic at the Lewisohn Stadium and by the Philadelphia Orchestra at Robin Hood Dell are perhaps the best known.

This summer those resident on the Clemson campus, as well as those of the nearby communities, have an equal opportunity to sit under the stars and listen to great music played by the great orchestras both of this country and abroad. For every Wednesday evening an outdoor concert is being given in the garden of the John C. Calhoun home, Fort Hill, at Clemson.

The concerts are made possible by the gift on the part of the Carnegie Corporation of New York to the college of some nine hundred records, together with apparatus for reproducing and amplifying the music.

## WELCOME, FRESHMEN

To the thousands of prospective students, loyal alumni, and members of the present student body the Tiger extends its greeting in this the annual Summer Edition. In this issue we of the staff depart from the conventional news coverage practiced during the current year and attempt to give the reader a clear-cut picture of life at Clemson—a picture which is a source of information both to the old grad who cherishes dear memories of his alma mater and to the high school graduate to whom Clemson is perhaps as yet merely a mental picture.

Consistent with their policy of keeping their building program apace with the rising enrollment, college officials have launched a building and remodeling program which is unexcelled in the history of the school and which will provide adequate classroom space and living quarters for the student body. Outstanding in this program is the plan for Clemson's new \$300,000 textile building—a building designed to fill all requirements of a modern school of textiles. Prominent also is the addition to the Chemistry building, a long-felt need at Clemson. This addition will provide a particular increase in laboratory facilities. News has been received from Washington to the effect that a new \$90,000 post office building for Clemson has been approved. Extensive work has been done on the Administration Building and the Library, and six well-planned and well graded tennis courts have been constructed by the Athletic Association.

To the young men who may be classed as prospective members of this class Clemson offers only the information contained in these pages. The information in this issue is not to be confused with a "sales talk". It is merely compiled as an attempted picturization of Clemson College—its campus life, its aims, its services, to the state, and its ideals. We do not harbor the thought that each article contained in these twelve pages will each be of interest to each individual, but if any one article serves to give a prospective student desired information, an alumnus a welcome glimpse into the present life of his alma mater, or the present student news of interest, we will feel that this edition will have accomplished its purpose.

## ESPRIT DE CORPS

EACH YEAR WHEN the majority of the cadet corps are reveling in a light touch of spring fever and heaving sighs of relief that Big Inspection has been successfully passed and that drills will be cut to a minimum, a group of determined students meet on Bowman Field each afternoon and voluntarily give their services to the forming of the pride of Clemson's military life—the Senior Platoon.

The culmination of these hours of toil is the competitive drill scheduled as part of the military Field meet held at Camp McClellan each year. This year as in the past years the platoon finished a close second in close order drill competition

## A STEP FORWARD

IN AN EFFORT TO PROMOTE a better relationship between freshmen and upper-classmen, to aid freshmen in getting adjusted more quickly, and to create a better esprit de corps, members of the local chapter of Blue Key, national honorary fraternity, are sponsoring a new freshmen system—a system which has received the approval of college officials and which will be presented for the approval of the senior class next September.

Elsewhere in this issue the reader will find a detailed explanation of this proposed system, its conception, its aims, and its advantages, so we shall not discuss it at length in these columns. While employing the editorial we, we only wish to emphasize a few significant facts. First, we wish to emphasize that members of Blue Key are not trying to force anything down the corps' throat, so to speak. The plan will be thoroughly discussed at student meetings before it is put into operation. Secondly, the plan is not an impractical dream, neither is it the result of haphazard thinking. It is a system carefully drawn up by a group of students who have been recognized to some degree at least as student leaders. Prominent college officials have also devoted much time to the perfecting of the plan.

Most important of all, the new system does not propose to do away with existing systems. A careful reading of the proposed plan will reveal that no attempt has been made to do away with the present system of hall details, room service, and hazing for "disciplinary" purposes. Blue Key has no desire to abolish these existing systems—it merely offers a plan to make these systems more effective.

There is little question as to the practicability of the plan, but it is doomed to failure unless there is cooperation of the highest degree. You of the senior class are the ones who will determine the fate of this forward step. We urge you to face the problem with an open mind, to read the details of the plan carefully, and return to Clemson in September with the intention of giving the new system a fair chance at least.

## A JOB WELL DONE

ONCE AGAIN CLEMSON'S JUNIORS have made the exodus into the flatlands of Alabama for a six-week's period of military training. Beginning their encampment with the conviction that they would bring Clemson to a better standing, despite everyone's predictions, the Class of '38 returned from the ordeal boasting the best record a Clemson delegation has yet amassed. To the students and officers who cooperated to make this splendid achievement possible we feel that congratulations are in order.

Due to the fact that its ROTC delegation is always the largest, Clemson is greatly handicapped particularly when disciplinary records are compiled under the system employed by Camp officials. A comparatively small college whose ROTC training is voluntary can usually send a small group of students who are primarily interested in military training. Such a group takes Camp seriously and serious infractions of regulations by any of its members is rare. It is this type of college which invariably wins top honors. To win recognition with a group of 183 men—a group of which a large percentage may well be interested only in the check they receive from the government is no easy matter.

Considering these facts, it is evident that Clemson need never make apologies regardless of her record. Also in view of this situation this year's record is particularly note-worthy. Men and officers who went through the ordeal and cooperated and made the extra effort to make this record possible we salute you.

and no claimants questioned their superiority in fancy drill maneuvers. Again as in past years the margin of victory was negligible. Though they failed to win the coveted cup the platoon won the admiration of every trainee and officer present.

This fall the platoon will be featured at football games and various ceremonies. The members have worked hard to attain the stage of perfection they can now boast of. Their unit has become an integral part of Clemson's scheme of organizations. In short, they need and reserve the whole-hearted backing of the corps of cadets.

## Talk Of The Town

### WELCOME

After lapsing into silence for some eight weeks, the battered old flat-bed press is once again roaring and Tigers are streaming out to the four corners of the southeast to make prospective students wonder just what the hell this place is all about anyway, to give alumni another chance to cuss us for not devoting enough space to alumni news and sports and to give the present student body a chance to raise Cain because they didn't get that captain or first sergeant they were pulling for. Not since the week after spring holidays when we got tied up to our necks in a special high school edition which included what we thought was a cute little photo-gravure section have we had so much trouble on our hands. We came here straight from the six weeks ordeal at Anniston and we've been here three weeks picketing the comandants office in an effort to get the appointments, running around trying to get cuts to run and digging up twelve pages of reading matter out of thin air. It's really been just a little complicated throwing this job together and we hope you will like it.

### TALK OF THE TOWN — FORTY DAYS AND FORTY NIGHTS

Just as we suspected, our forty days and forty nights in Anniston left its mark on us. We are no longer the blythe, gay youths we once were, and a sneer bordering on the cynical has replaced our boyish grin. When we talk, our conversation sooner or later veers around to some camp experience no matter what our original topic was, and when we start pounding on the typewriter, some camp anecdote eventually evolves from columns of type. You've probably heard everything that we have to say about camp, and you'll hear it told over beer bottles and tops of scarred tables many another time, so you'll just have to pardon us if we take advantage of being the first ones able to put it into print. You new people won't know what we're talking about, but we cherish the fond hope that perhaps some rising senior who has been through the mill will get a chuckle or two from our feeble efforts.

### TALK OF THE TOWN — COMBAT PRINCIPLES

There are thousands of things we could spend hours telling you about . . . the 1906 rifle we had which beat our teeth out each time we shot it, days we spent sweltering in the pits pulling 1000 lb. targets, fifty mile hikes with hundred lb. packs on our backs, trying to pitch a pup tent with an LSU man, standing in lines for days for the privilege of signing our name to another scrap of paper, holding our tent pole up with one hand during a storm while our trunk went floating out the door, etc. but the only thing we feel like mentioning is the only time that we got commended by the army during the six-weeks period. It was during a combat principles and we were ploughing our way through underbrush that would baffle Frank Buck. Suddenly we came to a cleared spot and the command to hit the ground rang out. We were running at a fairly fast clip and just as the command was given, we stepped into a four foot fox hole and sprawled thirty feet on the hard clay surface. Just as we were regaining consciousness, the first thing we heard was a gruff voice tinged with enthusiasm shouting "that's the way to hit it, buddy, that's the way . . ."

### TALK OF THE TOWN — ARMY IN THE SADDLE

Before closing we would like to add somewhat as a word of warning that a new spirit is in the air at Clemson . . . begun at the first Big Ten meeting, and fanned into a flame by the success at camp a militaristic spirit has pervaded the atmosphere . . . next fall freshmen will be saluting vigorously and saying "sir"

—that Oscar can't swear to anything that has happened since Finals, but his secret agents down in 'Bama report that unfortunately the boys were on their best behavior, and it remained for Farmer, Stokes, Clayton, and a few other regulars to make this column possible.

### OSCAR SAYS

—that Bell, F. L. insists that the Kadets call him "Ding-Dong" and not "Knock-Knock," and that our Colonel hasn't yet forgiven that lil Atlanta lass for thinking that THE BIG TEN was a football conference composed of Northwestern, Purdue, and several other northern schools instead of Clemson's pride and joys.

### OSCAR SAYS

—that even the thought of an extra service stripe doesn't satisfy (Watch that arm swing) Stokes when he thinks of losing those cherished sergeant-major chevrons, and Oscar has been requested to inform the public that the boy wonder hasn't been reduced when he appears with those captain stripes.

### OSCAR SAYS

—that Betty Horton thought that Diamond Bill Folk was the cutest thing at Commencement until the appointments were announced, and then her attack switched to the strong arm of Lt. Col. Spike Reginald Denny—a rising senior—you know how it goes.

### OSCAR SAYS

—that the weather was fine at summer school and Harris Sweat with the aid of Duck Boozier managed to hold retreat outside every evening.

### OSCAR SAYS

—that (I'm going to run the school on the week-ends) Farmer wasn't becoming musically inclined when he started singing "Tip-Toe to the Tu-Lips," but Oscar is positive that the tall daughter of the Colonel had something to do with it.

### OSCAR SAYS

—that the fairer sex of Anniston can rest in peace now that Uncle Sam has moved the backbone of his army elsewhere, including Red Bethea with his candid camera.

### OSCAR SAYS

—that Thom. Q. Stanley (The Q stands for contrary, and if you don't believe it, ask McGinty) insists that he is staying at school during the summer to get a head start on next year's Taps, but Oscar thinks that that executive job that rates boots has something to do with it.

### OSCAR SAYS

—that although the Clemson hop down at Fort Mac was the biggest of the season, Oscar can't seem to find anyone who remembers being there, but has heard that people spent hours looking for the orchestra that O. F. Morgan, Esquire, and his stooges swung up in the rafters.

### OSCAR SAYS

—that for the information of prospective high school students, even though the Clemson Military Department thinks that it maintains discipline over the corps, it is really Oscar with his watchful and discerning eye who is responsible.

### OSCAR SAYS

—that after an extensive search Oscar has discovered that the cause of the gradual decrease in the crowds at Myrtle Beach (A summer resort) was because our Goon Miller is the outstanding life guard at Boscobel this summer.

### OSCAR SAYS

—that the crate of cantaloupes St. Claire Guest sent the summer school matron (after a big summer at Clemson) was the biggest barter since Red Bethea gave a certain prof a country ham to pass him on Rat English.

to officers, even shavetails will take command . . . in short, the eagle over the Commandant's door is belligerently flapping his wings; so pardon us while we go out and cut a few corners.

# Annual Scholarship Awards Made At Commencement

## MANY ATTRACTED BY SUMMER PROGRAM AT CLEMSON COLLEGE

### Groups Swarm Campus During Summer As College Continues Activities

The 1937 Summer School closed July 16th. The enrollment this year, which amounted to 332, was a decided increase over that of previous years.

The Summer School Assembly was held on Tuesday, July 13. Mr. James H. Hope, State Superintendent of Education and Dr. E. W. Sikes, President of the College, addressed the student body and visitors. Miss Holleman's class in Public School Music gave an assembly program demonstration on this occasion. These junior musicians also broadcast from Radio Station WAIM in Anderson.

Many visitors were attracted to Clemson during the six weeks' program. The work of Mrs. Sharpe and Mrs. Wilson was of special interest to primary teachers. The farm shop program put on by the Woodshop and Forge and Foundry Departments in cooperation with the Department of Agricultural Education was of special interest to vocational leaders in this field. Bacteriology, Organic Chemistry, English, and Mathematics were popular courses.

A new feature of the Summer School under the present administrative set-up was the Cottor Classing Course. Mr. B. V. Persson of the Atlanta office, Bureau of Agricultural Economics, U. S. D. A., was in charge of instruction. Sixty-five students were enrolled in the class. The group was so well pleased with the work that they sent resolutions of commendations both to the College and to the authorities in Washington, D. C.

## VARIED CURRICULA IS OFFERED AT CLEMSON

### Registrar Indicates Major Courses Offered by Clemson's Six Schools

More than twenty courses of study are offered at Clemson College. These curricula are organized under the various schools of the college. With the exception of certain courses, the entering student is required to select only the broad field which includes the major courses he desires to pursue. Freshmen are enrolled in Agriculture, Agricultural Engineering, Chemistry, Engineering, Architecture, General Science, Textiles, Vocational Agricultural Education, Education, and Industrial Education. A choice between majors such as Animal Husbandry and Agricultural Economics, or Electrical Engineering and Mechanical Engineering, or Textile Chemistry and Weaving and Designing, may be made at a later time in the college course.

The major courses in each School at Clemson are indicated below:

- School of Agriculture**
  - Agronomy
  - Animal Husbandry
  - Agricultural Economics
  - Dairy
  - Entomology
  - Horticulture
  - Agricultural Engineering
- School of Chemistry**
  - Chemistry
- School of Engineering**
  - Architecture
  - Chemical Engineering
  - Civil Engineering
  - Electrical Engineering
  - Mechanical Engineering
- School of General Science**
  - General Science
  - Pre-Medical
  - Pre-Professional
- School of Textiles**
  - Textile Engineering
  - Textile Chemistry and Dyeing
  - Weaving and Designing
- School of Vocational Education**
  - Vocational Agricultural Education
  - Education
  - Industrial Education
  - Textile Industrial Education

Dr. Enoch Walter Sikes, Clemson's beloved President who has been so instrumental in raising Clemson College to its position of preeminence in the South. While caring for the material growth of Clemson, his efforts to raise the intellectual and moral standards are unceasing. The problems of the cadets are his problems, and he is never too busy to attend to them.

## President Sikes Delivers Annual Message To Freshmen

By Dr. E. W. Sikes

Shall I go to college is a question that many boys and girls are considering. On its answer depends their weal or woe. Here are some of the things that make them stop, look and listen.

More than a million boys and girls in the United States will soon be trekking toward college gates. They think it is worth while. You have to live your life right along by the side of these. You will want the same jobs and will want to exercise the same influence. Will you be giving them an advantage over you if you do not join them?

Elders advise you to go to college. The number going to college has increased. Your father will tell you that four times as many go now as did when he was in school. Your elders have grown in wisdom and have made some keen observations. Many of them will tell you that they have felt handicapped in the race of life,

that much that they have accomplished has been over obstacles.

The sacrifices made by parents indicate that they believe it is worth while. They pay the largest part of the cost. They are willing to deprive themselves of necessities to give you the chance—a better chance than many of them ever had. They want you to grow into the best man or woman that is possible. Students will do well to listen to the counsel of parents. They are older and wiser.

Teachers will tell you that twice as many are taking vocational training in agriculture as did ten years ago while courses in home economics have more than doubled. Parents, teachers, and students have come to realize that training for a vocation is wise. The depression has brought about this realization. An essential part of making a life is training to make a living.

Trained intelligence is in demand. "Hands" are easily found.

Unskilled labor glut the market, but skilled, trained labor is in demand. To do the same thing every day is easy, but to know why it is done and how to do it better requires training and initiative.

Preparation for readjustment. Any student of progress will tell you that change is written over every thing, that new methods and substitutes come on the market daily. Inventions and discoveries will be made regardless of your wishes. Then it is the part of wisdom to train yourself so that you can be adjusted to the new regime.

Ambition is the dynamo of youth. If you have no desire to better yourself, to fit yourself for worthy enterprise, if you are content to be a "hewer of wood and drawer of water," to be a learner and not a lifter, then stay away from college for you will bring only a dead battery into a live workshop. Stay home until you change, for at college you will not even "miss fire."

## Statistics Indicate Record Enrollment

### Total Enrollment Expected to Approach 1700 Mark For '37-38

As this edition goes to press, data in the Registrar's Office reveal that the enrollment for the 1937-1938 session will approach the 1700 mark. The number of freshman applications accepted to date is greater than the number accepted by July in any previous summer. The number of upper-classmen planning to return in September is also greater than the number enrolled in any previous session.

Since the opening of the college in 1893, the enrollment of Clemson has continued to increase. This growth of the College is an indication of the constantly increasing recognition of the many advantages which Clemson has to offer the students of the State. The large number of students from other states also indicates that the excellence of the various schools of the college is being recognized throughout the nation.

The following figures for representative years show the general trend toward enlargement of the student body:

1893	446 students
1907-1908	687 students
1917-1918	804 students
1927-1928	1212 students
1937-1938	1700 (estimated)

## SIXTEEN MEN LISTED AS HONOR GRADUATES

### Student Must Rank in Upper Ten Per Cent Of Class

In accordance with a plan adopted by the institution this past year, sixteen members of the 1937 graduating class were designated as Honor Graduates of Clemson College. The list includes William Monroe Epps, Latta; William Folk, Jr., Moncks Corner; Ralph Lewis Geisberg, Anderson; Edward Starkey Frank Giles, III, Greenwood; James Rhett Hendricks, Pickens; Robert Eldredge Hilton, New Brookland; Jess Willard Jones, Greenville; Winston Alvin Lawton, Matewan, West Virginia; Fred Herbert Lewis, Loris; Gordon McGlohon Nichols, Savannah, Georgia; James Wallace Rion, Columbia; Raymond George Edward Steever, Lykens, Pennsylvania; Marvin Clyde Valentine, Jr., Cope; Everett Pierce Ward, Graniteville; Richard Benjamin Wearn, Newberry; and Cecil Glenn White, Jr., Tucapau.

The plan adopted by the college specifies that the highest ten per cent of graduating classes be designated as honor graduates provided that no student be so designated unless he has a grade-point ratio of 6.5 or above which is equivalent to an average grade of "B plus."

## W. T. Ferrier to Be Aso. Ag Economist

### Professor Is Graduate of Colorado State and U. of Minnesota

Mr. W. T. Ferrier has arrived on the campus to fill the position of Associate Agricultural Economist in the Department of Agricultural Economics.

Mr. Ferrier comes to Clemson with a broad background and excellent training. Although a native of Nebraska he operated a farm for several years in Colorado, and took the M. S. degree at Colorado State College. He has completed all residence requirements for the Ph.D. degree at the University of Minnesota and expects to complete his thesis in the early fall. He will teach courses in Marketing and will carry on research in the same field in the South Carolina Experiment Station.

Mr. Ferrier taught and did research work in Economics for several years at the University of Minnesota, but immediately before coming to Clemson was employed in the Federal Farm Credit Administration, Washington, D. C.

Mrs. Ferrier and the three children are visiting in Minnesota, Wyoming and Iowa, but will join Mr. Ferrier at Clemson the early part of August. They will occupy the home recently built by Mr. and Mrs. Bob Stutts in North Clemson.

## HONOR MEN RECEIVE MEDALS AT CLOSING CEREMONY OF YEAR

### Wearn, Mazo, Ruff, Jones, Stanley, Ashmore, Camp and Hilton Honored

The scholarship awards made during the commencement exercises this year were announced too late to be published in the last issue of the Tiger. The following medals and awards were presented at that time.

The Norris Medal awarded to the student having the best all-round record during his entire college course was awarded to R. B. Wearn of Newberry.

The Trustee's Medal presented to the best speaker at the annual joint meeting of the two Literary Societies went this year to Earl Mazo of Charleston, representing the Calhoun Society.

The award of the R. W. Simpson Medal for the best drilled cadet in the Clemson College Cadet Brigade was awarded to W. H. Ruff of Ridgeway.

The prize given by the Faculty of the School of Agriculture to the Agricultural graduate having the highest scholastic record for four years was awarded to J. W. Jones of Greenville. Mr. Jones was also awarded the Anderson Fellowship which provides the sum of \$400 to be used by the recipient in pursuing graduate study at Clemson or some other institution.

The South Carolina Chapter of the American Institute of Architects awards each year a medal to a junior making an outstanding record in Architecture. The medal this year went to T. E. Stanley of Marion.

The award of the Arnold Boyd English Honor Key for the best work in the English Department for four years was presented to H. S. Ashmore of Greenville.

The Textile Colorist prize for the best work in Textile Chemistry and Dyeing was awarded to B. H. Camp of Chesnee.

The award of the medal offered by the National Association of Cotton Manufacturers for the student attaining the highest excellence in Textile Engineering was presented to R. E. Hilton of New Brookland.

An award of fifty dollars presented by the Clemson Foundation to an undergraduate who is attending Clemson largely through his own efforts and whose scholastic record has been good was awarded this year to H. C. Jones, Jr. of Saluda.

The pen with which the diplomas of the members of the graduating class were signed was presented to T. I. Martin of Florence, President of the Class.

## CADETS ADVISED TO MATRICULATE EARLY

### Reservations and Roommate Assignments Depend On Receipt of Cards

Applications for admission to Clemson College should be sent to the Registrar's Office as soon as possible. All high school graduates interested in entering for the 1937-1938 session should have their high school records forwarded to the Registrar immediately.

All new students who have been accepted by the college for admission should return their matriculation cards as early as possible. Old students should also return their cards early in order that places may be reserved for them. Reservations, room and roommate assignments depend upon the early receipt of the matriculation cards.

Prospective students desiring application blanks, copies of the college catalog, or general information should write to G. E. Metz, Registrar, Clemson College, Clemson, South Carolina.

J. A. Warren, Jr., '27, is an electrical engineer with the Bell Telephone Company of Pennsylvania. He is located in Pittsburgh.

## CLEMSON EXTENSION DEPARTMENT RENDERS INVALUABLE SERVICES TO STATE FARMERS

**Mr. D. W. Watkins Directs State-Wide Program of Service Branch**

The third school for extension workers and county agricultural leaders to be held in the state will assemble here during the week of August 23, according to an announcement recently made by D. W. Watkins of the Extension Service.

Representatives of the United States Department of Agriculture and others will cooperate with the Extension Service in conducting a program including educational, economic, and philosophical subjects, and also features intended to aid in county agricultural program building.

The attendance at this conference will include extension supervisors, specialists, county agents, home demonstration agents, and selected committees of agricultural leaders from all counties of the state. It is estimated that from 500 to 600 people will be present at this meeting.

### Extension Activities Growing

Coming as a result of improved farm income and farm conditions, increased interests and activities of farmers are giving extension workers a busy year. The number of demonstrations being conducted in improved, scientific methods of farming and home-making is larger than in many years, and many advancements of a definite and permanent character are being made in the agriculture of the state.

### Farm Management

The agricultural program for each county of the state has been

D. W. WATKINS

planned by groups of farmers and farm women cooperating with the extension agents; and, as a means of placing their farms upon a business basis, 250 farmers are cooperating with the agents and the farm management division in keeping complete farm records.

### Agricultural Engineering

Rural electrification is steadily covering the state, and the division of agricultural engineering and the county agents are busy assisting rural communities in organizing to obtain rural lines, and in holding schools to teach farm people ways and means of obtaining the greatest value from the use of electricity. The farm building-plan service of this division is also developing and at present many plans for modern farm buildings and structures are available for use.

In the county terracing program 46 power terracing outfits are in operation under the supervision of county agents in 20 Piedmont and middle-state counties in the fight against soil erosion.

### 4-H Club Work

Enrollment in 4-H clubs has risen to almost 30,000 farm boys and girls, the largest in the history of the Extension Service. All counties are holding summer encampments and tours for these club members, whose results with crop and livestock projects often rival those of the farmers themselves.

Around 1000 farmers have enrolled and are conducting demonstrations in the five-acre cotton improvement contest, which during the past ten years

## National Society Names Earle Prexy

**Clemson Dean Named Head of ASPEE at Massachusetts Conclave**

On July 1st at Cambridge, Massachusetts, the American Society for the Promotion of Engineering Education elected Dean S. B. Earle, of Clemson, as its president for the 1937-1938 year. Dr. Earle is Dean of the Clemson College School of Engineering.

Dr. Karl T. Compton, president of the Massachusetts Institute of Technology, and F. C. Bolton, dean of the school of engineering of Texas A. & M. College, were elected vice-presidents. The convention voted to hold its 46th annual meeting at Texas A. & M. College, College Station, Texas, next year.

Dean Earle was further honored by the nominating committee of the American Society of Mechanical Engineers when he was elected manager and a member of the council for the next three years.

The membership of the ASME totals more than 15,000 persons and Dean Earle has been a member of the organization since 1905.

has revolutionized the cotton growing industry in the state. One thousand more farmers are conducting demonstrations in cooperation with the agronomy division and the county agents in corn and small grains.

### Livestock

Hog production has grown into a big business for the farmers of the state. Cooperative carlot shipments under the supervision of the county agents and the livestock and marketing divisions, have already exceeded last year's figures, and are estimated to exceed \$1,000,000 during this year. Many purebred boars and beef bulls are being placed, and preparations are being made for a great 4-H club beef cattle and pig show at the state fair at Columbia in October.

### Dairying

Three dairy herd improvement associations are operating under the supervision of the dairy division, which has also, with the county agents, been active in placing selected purebred dairy bulls with farmers of the state. This program of purebred dairy sires has, during the past 15 years, resulted in raising the state in milk production per cow from sixth place to second place among the southern states.

### Crop Insects and Diseases

Over 200 cottonseed treatment demonstrations are being conducted in the state, and records show that as a result of this work during the past two years over 250,000 bushels of planting seed were treated this year. County agents and their division have been active also in the campaign for boll weevil control in the cotton crop.

### Orchards and Truck Crops

The horticultural division and the marketing division, with the county agents in the Piedmont counties, have been active in assisting peach growers in producing and marketing the largest peach crop in years. These divisions with the agents in the middle and lower state counties have been busy with the production and marketing of truck crops, and with the crop of new Louisiana type Porto Rico sweet potatoes, which are proving profitable to the growers, who are conducting over 100 record demonstrations in the production of this type potato.

Poultry demonstration flocks and the cooperation of poultrymen in the National Poultry Improvement Plan, together with poultry schools in many counties have meant a full year for the poultry division. Four-H poultry work is popular, and poultry specialists and agents aid these young poultrymen in building a successful enterprise.

While Dean Willis of Clemson's Textile Department looks on approvingly, Governor Olin D. Johnston signs the Textile Bill which gives Clemson a \$300,000 Textile Building. Both men are men who came up through the textile industry, and they have consistently advocated the betterment of the textile industry in the state. Work on the building will be begun in the near future.

## GOVERNOR JOHNSTON SIGNS TEXTILE BILL GRANTING CLEMSON \$300,000 BUILDING

**South Carolina Governor Has Constantly Striven to Aid State Textiles**

Governor Olin D. Johnston very recently signed a College Buildings Bill which enables Clemson College to obtain a new \$300,000 textile building. Governor Johnston is very much interested in the textile industry of South Carolina, and has consistently advocated the passage of bills which in his opinion would aid that industry and the people who are engaged in it.

### Worked Way Up

Both the Governor and Dean Willis of Clemson Textile School came up through the textile industry and worked their way through college. Governor Johnston was educated at Textile Industrial Institute, Wofford College, and the University of South Carolina. He is a World War veteran, having served 18 months over seas, where he received a regimental citation. The Governor entered politics and occupies the most honored position South Carolina has to offer.

### Clemson Grad

Dean Willis is a graduate of Clemson College and served 26 months in the States during the World War. After the war he went into cotton research and educational work. He served as assistant supervisor of textile education in North Carolina, was for nine years cotton specialist in spinning research for the U. S. Department of Agriculture, and in 1927 was elected Dean of Textiles, Clemson College, the highest position in the textile educational field in South Carolina.

## INDUSTRIAL EDUCATION POSITIONS NOW OPEN

With the passage of the George Deen Act several new positions were created, and men are needed for some of these positions. Persons who are college graduate and who have had industrial or trade experiences and have the other qualifications needed for teacher may meet these requirements by taking training at Clemson the second summer term. Industrial Education and Engineering graduates have some advantage, but outstanding men from other fields may be considered. Interested persons should write Mr. C. M. Wilson, State Department of Education, Columbia, S. C., or Mr. L. R. Booker, Clemson College, Clemson, S. C., for information.

W. B. Calhoun, '27, is a Citrus Grower, Packer and Shipper

## VARIED COURSES ARE GIVEN BY CLEMSON'S SCHOOL OF TEXTILES

**Local Textile School is Third Oldest in United States: Is Well Equipped**

For the past several years the Clemson Textile School has made many improvements in courses offered. This improvement is reflected in the increased demand for Clemson Textile trained men. The Clemson Textile School has grown from some sixty-five students in 1927 to 298 in 1936-37. Even with the large increase in students the Clemson Textile School has been able to supply less than half the number of men requested by the textile industry. During the last six months the Clemson Textile School has had some eighty calls for its graduates, about half for men in the past June class, whereas the other calls were for Clemson Textile men who had from one to five years' experience. These calls were largely from mills in the two Carolinas and Georgia. During the past month the Clemson Textile School has had four inquiries for Clemson Textile men with three to five years' experience; these particular jobs carrying a salary from three thousand to thirty-six hundred dollars per year. Of course, the graduates when they first go out after completing their course, find it necessary to begin at the bottom for the first few years in order to obtain the necessary practical experience. In textiles, as in law and medicine, one must serve those few years of apprenticeship necessary to obtain practical information and to establish his reputation.

This year the Clemson Textile School had thirty-three graduates. All these men who wanted jobs were placed upon graduation. Having placed these thirty-three men, many additional inquiries came which the school was unable to fill because of the shortage of graduates. These men were placed in the industry at a salary of fifteen or thirty dollars per week.

As soon as the new textile building is completed, the Clemson Textile School will be able to continue improving its curriculum, and an increased enrollment in Textiles at Clemson can be accommodated.

Dean Willis states on his past ten years of experience: "I can place from fifty to sixty graduates each year."

"This increased demand for Clemson Textile men is due largely to three factors: (1) Improvement of textile courses which has been done through the cooperation of the entire staff of the Textile School which consists of eleven trained men. (2) Due to the record which former Clemson Textile graduates have made in the industry. (3) The recognition on the part of the manufacturers of the value of textile-trained men.

## PROFESSOR ANDREWS LEAVES FOR CORNELL

Mr. F. S. Andrews, associate professor of horticulture, left Clemson the latter part of June for Cornell University, Ithaca, N.Y. to spend a year in graduate work. Professor Andrews will major in vegetable crops and minor in small fruits and plant physiology. His work at Cornell will be under Dr. H. C. Thompson, head of the department of Vegetable Crops.

Professor R. R. Ritchie of the department of Animal Husbandry is attending summer school at Iowa State College this summer.

Professor George B. Nutt, assistant professor of agricultural engineering, is spending the summer studying in the department of agricultural engineering at Iowa State College, Ames, Iowa.

C. T. S. Wilburn, '32, returned to Clemson for the second semester of the past session and for the summer school term to take courses in Agricultural Education. He has accepted a position as teacher of Agriculture at Oakway, South Carolina.

## Gooding Outlines Poultry Program

**Short Course to be Held At Clemson from Aug. 31 to September 3**

A program that will cover all phases of poultry production has been arranged for the eighth poultry short course to be held at Clemson College August 31 through September 3.

This short course in the poultry industry is arranged to afford busy farmers, poultrymen and hatcherymen an opportunity to get more information on the fundamentals of poultry raising, says P. H. Gooding, extension poultryman, pointing out that there are no requirements for entrance to the course.

The college poultry plant will be open at all times, and full opportunity will be given for persons to become familiar with the methods employed in its operation.

Stating that special emphasis will be placed upon culling, judging and selection, Mr. Gooding announces that an optional examination will be held in selection and judging following the course, and that persons successfully passing the examination will qualify as selecting agents to cull flocks in compliance with the National Poultry Improvement Plan.

Rooms will be available in the college dormitories for both men and women without charge, it is announced, but persons occupying them must bring along pillow, pillow case, sheets, (single width), light cover and towels. Meals may be obtained at various lunch rooms on the campus for about \$1 a day.

## TRAYWICK APPOINTED ENGLISH PROFESSOR

Mr. Buckner B. Traywick, A. B. of Emory University, A. M. of Harvard, has been appointed instructor in English succeeding Mr. Ward Pafford who resigned to accept a professorship in English in Emory Junior College at Valdosta, Ga. Mr. Traywick has had an additional year in Harvard on work towards his Ph.D. He is Phi Beta Kappa and a member of the Alpha Tau Omega social fraternity.

W. F. Gilland, '37, is Assistant Registrar at the University of South Carolina.

# Deans Announce Courses Of Clemson's Various Schools

## AG SCHOOL OFFERS VALUABLE TRAINING TO MANY STUDENTS

Cooper is Dean of Oldest School at Clemson, S. C.'s Only Ag. College

The purpose of the School of Agriculture is to train students for leadership in the broad field of Agriculture. How well it has done this is shown by its hundreds of graduates who hold responsible positions throughout the United States. More and more of its graduates are returning to the farm where they put into practice the principles of scientific agriculture. By their example others are stimulated to try the more modern methods of agriculture and thereby the whole community benefits.

When the College opened its doors in 1893 there were 150 students enrolled in the school and only twelve strictly agricultural courses were given. Today there are 300 students working toward a degree in some branch of agriculture and the school offers 106 courses. In addition to the students who are working toward a degree in agriculture there are approximately 300 other students enrolled in courses offered by the school. The teaching staff is composed of thirty-two thoroughly trained and highly specialized men in their respective fields.

The School offers students seven major fields of specialization leading to the B. S. degree: Agricultural Economics, Agronomy, Animal Husbandry, Dairying, Horticulture, Zoology and Entomology and Agricultural Engineering. All students in agriculture take the

DEAN H. P. COOPER

basic curriculum in the freshman and sophomore years. This curriculum is designed to give the student a broad background in the sciences. Upon this background are built the specialized courses required in his major field, which he elects at the beginning of his junior year. Students in Agricultural Engineering follow a specialized curriculum throughout the four years.

For eleven years following the destruction of the old Agricultural Hall by fire, the school was seriously handicapped for lack of class rooms and laboratory facilities. The new Agricultural building completed in March of this year is a modern fire proof structure with classrooms and laboratories especially designed for teaching the subjects offered. The school looks forward with keen anticipation to the coming year. The work to be given will be of a higher character than has been possible heretofore and it is expected that the students will be stimulated to greater accomplishments with the modern facilities at their disposal.

Agricultural graduates are prepared to fill positions such as: teachers, experiment station workers, county agents, club leaders, extension specialists, agricultural agents for banks, insurance companies, farm machinery manufacturers, commission firms, promotion agents for spray materials and many others in various fields

DEAN F. H. H. CALHOUN

## CHEMISTRY SCHOOL OFFERS ATTRACTIVE SCIENTIFIC COURSES

Chemist Industry Demands Large Number of Well-Trained Employees

During the next decade the demand for chemists in the south will increase very materially. Chemists will be needed because of the development on a large scale of our natural resources and materials. Within the last few months, many great mills using pulp wood in the manufacture of kraft paper have located in the south. Two of them are in South Carolina, at Georgetown and Charleston, and a third just across the state line, in Savannah. That other mills will come to make not only kraft paper, but newsprint as well, is inevitable, for South Carolina is capable of producing sufficient pine each year to supply many mills the size of the ones already located in the state. Following in the wake of the paper mills will come other industries utilizing the products of these mills, or furnishing to them necessary materials to be used in the production of paper. All these new industries will need chemists, and a chemist must be college-trained.

Industrial corporations consider their research chemists the most important part of their organization. If we make further advances in the art of living, in shorter hours and with more social security, the chemist and his test tubes will be largely responsible. The chemist tears some natural product down, finds out what it is made of, and then builds up a new substance out of something else often doing a better job than nature does. Synthetic rubber is now an assured fact; while gasoline can be made from coal; and billiard balls from milk.

During the summer a new two-story wing is to be added to the Chemistry Building, giving us more laboratory and classroom space. While we shall still be crowded, with over a thousand boys passing through the classrooms and laboratories each year, the additional room will enable us to give our courses much more efficiently.

For the last two years we have had no difficulty in placing our graduates. We have even been able to place some of our poorer students, for the need for chemists is great. We can always find jobs for good chemists, even in bad times; but it is not always easy to find jobs for inferior men even in good times. The chemistry course offers excellent opportunities to earnest men. A chemist must be careful, pains taking, accurate, and honest in his work. If these are not your characteristics, do not enroll for special work in this field.

Mr. R. K. Eaton, head of the Carding and Spinning Department of Clemson Textile School recently attended a textile economic conference in New York City. This meeting was sponsored by the Textile Foundation. Representatives of the other textile schools were also present.

## SCHOOL OF GENERAL SCIENCE HAS MANY STUDENTS ENROLLED

Well-Equipped Department Offers Large Number Of Cultural Courses

Every student who enters Clemson College is given instruction in the School of General Science in all academic subjects that are necessary for students in all the other schools and this school offers also cultural courses for any who may elect to take them.

The School of General Science offers a four-year course leading to the B. S. degree for those students who wish general training in the sciences and also offers three-year pre-professional courses for those who expect to study medicine, law, dentistry, etc. A student who takes the three-year pre-professional course will be awarded the B. S. degree from Clemson College when he has completed his professional course at a professional school approved by a committee of the members of the General Science faculty. Students are advised, however, to complete the regular four-year course before entering upon their professional study. Before taking the pre-medical course the

DEAN D. W. DANIEL

student should consult the medical college that he expects to attend and learn its specific requirements.

Elective courses in Religious Education are given by the four local ministers, and a course in World Social Problems is offered by Dr. S. J. L. Crouch.

Daniel is Dean

The School of General Science includes departments in English, mathematics, physics, economics and government, history, sociology and psychology, modern languages, and religious education. Elective courses are offered in all these departments.

The faculty, headed by Dr. D. W. Daniel as dean, is composed of men with special training in their respective fields. All have degrees from colleges and universities of high standards and all have done post-graduate work in leading universities. Ten of the staff have the Ph.D. degree and fifteen have the M. A. or the M. S. degree.

Seven additional classrooms, four in the Main Building and three in the Library, have been assigned to the School of General Science, and these rooms are being repaired and equipped. The Main Building is being rewired.

The office of the dean has been moved from room 20 to room 28.

## PROFESSOR CRANDALL CONDUCTS PROGRAMS

Professor W. G. Crandall recently conducted a three-day training program for teachers of agriculture in Tennessee. He was invited by the State Supervisor to conduct a conservation program during the annual teachers conference for that state.

In August he will spend a few days with the teachers of Oklahoma conducting a similar training program.

DEAN W. H. WASHINGTON

## SCHOOL OF EDUCATION PREPARES GRADUATES FOR VARIED POSITIONS

Offers Courses in Vocational Agriculture and Industrial Education

Courses of study offered under the School of Vocational Education include Vocational Agricultural Education, Education, Industrial Education, and Textile Industrial Education. The number of students enrolled in Agricultural Education in recent years has greatly increased to meet the needs for agricultural teachers. Graduates of other courses have in many cases returned to Clemson to secure special courses in this field. The demand for teachers of Industrial greatly exceed the number of students enrolled in this course.

College students who may have dropped out of college for a year or so and who have an interest in working with tools and machines should consider the advantage of being trained in Industrial Education, if they have the qualities needed by teachers of Industrial Education.

Clemson has had direct requests for twenty-seven graduates in this field from cities and towns in South Carolina and several other states. These positions pay salaries ranging from about \$900 to \$1800 per year. Experienced craftsmen who are graduates in other lines and who have taken only a relatively short training period in Industrial Education at Clemson have been in demand and some have gained salary increases as high as 66 2/3 per cent.

When this situation prevails we feel that the attention of high school graduates who are interested in teaching and are mechanically inclined should be called to the strong demand for good men. Anyone desiring special information on this subject should write W. H. Washington, Dean of the School of Vocational Education.

The curriculum in Industrial Education is broad enough to provide training for teachers in the specialized industrial field and in two or three closely related fields. Some Industrial Education graduates enter industrial employment after a few years of teaching and have gained rapid promotion. Many who remain in the education field have also gained rapid promotion.

J. S. Williamson, '16, is Chief Engineer in the S. C. State Highway Department. Mr. Williamson was awarded the professional degree of Civil Engineer by Clemson College in June. The title of his thesis is "The Development of Earth Type Bases for Hard Surfacing Roads in South Carolina."

I. W. Duggan, '19, is now Assistant Director of the AAA for the southern region with offices in Washington, D. C.

## ATTRACTIVE COURSES OFFERED STUDENTS IN ENGINEERING SCHOOL

One of Best Equipped Departments in South; Architecture Included

A great many successful engineers employed on various projects throughout the country are products of the Clemson College School of Engineering. Their work will be preserved as lasting monuments of engineering skill in various sections. Dr. S. B. Earle is Dean of this School.

The courses of study offered by the Engineering School at Clemson include Civil, Electrical, and Mechanical Engineering, Chemical Engineering, and Architecture. A teaching staff of twenty-two specialized faculty members directs the instructional work of this school.

Every student enrolled in Engineering courses is offered both practical and theoretical phases of engineering development. In addition to the regular subjects leading to Bachelor of Science Degrees, there are several special courses designed to prepare students for the more highly specialized fields of engineering.

Elective courses in aeronautics, radio engineering, and city planning attract many students during the year.

Beautiful Riggs Hall, the Clemson Engineering Building, is one of Clemson's newest and most attractive buildings as well as one of the most complete of its kind to be found in Southern Colleges. The equipment is modern; only this year air-condition-

DEAN S. B. EARLE

ing equipment has been added to the electrical engineering department, and a direct current welding outfit is a part of the new equipment placed in the Clemson foundry.

Dr. S. B. Earle, Dean of the Clemson School of Engineering and recently elected president of the American Society for the Promotion of Engineering Education, states the aims of his school as follows:

"It is our plan to train men for all phases of engineering and encourage them to become intensely interested in developing a varied industry in South Carolina."

"There is as much reason to have a diversified industry as there is to have diversified farming," Dean Earle continued, "and we believe that promoting diversified industry will do as much to help the farmers of South Carolina as any other thing we could do. It will assist materially in furnishing a local market for the products of South Carolina farmers."

## PROFESSOR TATE IS STUDYING AT PENN.

Professor H. S. Tate, Head of the Department of Industrial Education, is at Pennsylvania State College taking work towards his doctor's degree in Industrial Education. This is the second summer that Professor Tate has enrolled at that institution.

Dress parades play an important part in the military life of the corps of cadets. It is the corps' way of paying courtesies to visiting parties and of indicating to some degree to commanding officers their military efficiency. From a military standpoint, the climax of the year is the annual military day, scenes of which are shown above, which attracts thousands of spectators.

## W. R. CHEVES TO COMMAND FIRST REGIMENT; FULLER AND DENNY TO HEAD BATTALIONS

### Regimental Personnel and Company Assignments Announced by Commandant

According to recent information received from the Commandant's Office, W. R. Cheves of Savannah will be Regimental Commander of the First Regiment during the 1937-1938 school year with the rank of Cadet Colonel. Cadet A. E. Stalvey of Conway will serve as Regimental Executive with the rank of Lieutenant Colonel.

The Regimental staff will be composed of: A. R. Waters, Adjutant; J. C. Shelley, Chaplain; A. H. Pregnall, Sergeant Major; and G. C. Commander and F. H. H. Calhoun, Color Sergeants.

#### Battalion Commanders

E. H. Fuller, Lieutenant Colonel, has been appointed

CADET COLONEL CHEVES

Commander of the First Battalion with a staff composed of: J. H. Riddle, Executive; J. M. Gantt, Adjutant; and G. C. Waters, Sergeant Major.

R. M. Denny, Lieutenant Colonel, has been named Commander of the second Battalion with the following staff: F. J. Aichele, Executive; C. R. Saverance, Adjutant; and J. C. Cook, Sergeant Major.

#### Company Rosters

The following has been announced as the company rosters:

B-1—E. C. Ray, Commander; J. C. Wilkinson, Executive; T. W. Eatmon, and D. Richardson, Platoon Leaders; C. Woods, First Sergeant; and G. C. Salvo, Supply Sergeant.

C-1—W. H. Ruff, Commander; C. H. Cooler, Executive; J. M. Culpepper and W. D. Huff, Platoon Leaders; H. M. Covington, First Sergeant; and C. L. Vaughan, Supply Sergeant.

D-1—J. R. Ambrose, Commander; T. E. Stanley, Executive; S. O. Hoffman and W. D. Gregorie, Platoon Leaders; E. W. Shepherd, First Sergeant; and P. N. Drew, Supply Sergeant.

E-1—T. E. Peden, Commander; P. W. Bethea, Executive; P. R. Abercrombie and F. E. Bobo, Platoon Leaders; J. O. Sweeny, First

## No Drastic Change In Military Dept.

### Several Changes Made In Organization To Promote Better Efficiency

No drastic changes will be made in the Clemson College Brigade Military set-up during the ensuing year according to information released recently from the Commandant's Office.

Work has been in progress on the Cadet Regulations during the summer months, and the new and modified copy will be ready for distribution when the cadets arrive in the fall.

#### Minor Changes

One of the minor changes to become effective the next session is that of having Color Sergeants for the Regiments instead of for the Brigade. Two Color Sergeants have been appointed for both Regiments.

A Senior Non-ROTC company will be formed next term and will be designated as Company A-1 and will room in the new barracks in the same quarters that A-1 was located in last year. Officers for this company will be selected from the Non-ROTC personnel.

The Day Cadet company will be moved from the First Regiment to the Second Regiment and will be known as Company D-2.

Ninety-six corporals have been appointed six for each company. The remaining corporals will be chosen by the company commanders as the year progresses until the quota is reached.

Three Chaplains have been appointed for next year instead of the customary one. There will be a Brigade Chaplain with the rank of Captain and two Regimental Chaplains with the rank of First Lieutenant.

Second Lieutenants and Sergeants, as of last year, selected by qualification into the advanced ROTC.

G. E. Freeman, '18, formerly Assistant State Supervisor of Agricultural Education, has been made State Supervisor of Agricultural Education for Tennessee. His offices are at the state capitol at Nashville.

Sergeant; and T. H. Heatwole, Supply Sergeant.

F-1—W. E. Dunn, Commander; J. R. Huff, Executive; J. T. Seawell, and R. J. Jones, Platoon Leaders; J. B. Moore, First Sergeant; and W. T. Cox, Supply Sergeant.

G-1—W. P. Todd, Commander; H. D. Byrd, Executive; C. B. Lytton and H. H. McKinney, Platoon Leaders; F. Hughes, First Sergeant; and G. D. Page, Supply Sergeant.

H-1—J. W. Morgan, Commander; O. F. Morgan, Executive; M. Lane and R. E. Lawrence, Platoon Leaders; L. T. Garick, First Sergeant; and D. G. Hughes, Supply

## CLEMSON'S INFANTRY BRIGADE IS COUNTRY'S LARGEST R.O.T.C. UNIT

### Regular Army Officers Command Organized ROTC Brigade Here

The Clemson College Cadet Corps is organized as an infantry brigade, the only college unit in the United States so organized. The organization of skeleton form and consists of two regiments of two battalions each. Each battalion has four companies, and there is an additional company composed of the combined band and bugle corps.

Serving in the capacity of Professor of Military Science and Tactics and the Commandant of Cadets is Colonel C. W. Weeks, U. S. A. The Commandant has charge of all cadet disciplinary measures, cadet housing facilities, and other activities pertaining to the daily life of the corps. He is assisted in these duties by one regular Army officer, the college mess officer and barracks superintendent, three regular army sergeants, and the college supply officer.

Assisting Colonel Weeks in his duties as PMS&T are five

COLONEL C. W. WEEKS

regular Army officers detailed for reserve training duty and one regular army sergeant. These men serve as instructors in theoretical work.

#### Comprehensive Training

The ROTC training course at Clemson provides three hours of practical work a week, including such activities as drill, parades, formal inspections, etc., as well as classroom work. College credit is given for the technical work in military training, and upon graduation the student is awarded a commission as second lieutenant in the Officers Reserve Corps if he has fulfilled the required mental and physical requirements and put in six weeks training at an ROTC camp. During the first two years, the cadets are given a small uniform allowance which is deducted from their regular college payments. During their junior and senior years, ROTC students are paid at the rate of 25 cents per day in addition to their clothing allowance.

#### Cadet Officers Command

The discipline of the cadet corps is carried out principally by the cadet officers under the supervision of the commandant's staff. No Army officers reside in barracks and aside from the weekly Saturday inspections, they leave the cadet officers entirely responsible for the conduct of the corps.

## SENIORS GET COVETED ARMY COMMISSIONS

After serving their six-weeks training period at Fort McClellan, Anniston, Ala., ten Clemson Seniors received their Commissions as second lieutenants in the Officers Reserve Corps.

Clemson trainees to receive the coveted commissions were E. D. Wells, T. M. Richards, R. E. Leroy, R. N. Gambrell, G. H. Collings, A. C. Patterson, W. M. Simpson, E. S. Welch, L. R. Weaver, and H. A. Wood.

Interior view of new barracks room showing typical cadet living quarters. Clemson's students live in barracks under supervision of cadet officers. Army officers visit barracks only to make weekly inspections. At this time, quarters must be systematically arranged and spotlessly clean.

## STAFFORD IS SECOND REGIMENT COMMANDER BATTALIONS LED BY TAYLOR AND SKARDON

### Clemson Cadet On Area Rifle Team

#### Clemson Student to Shoot in National Matches At Camp Perry

R. V. Jackson, rising Clemson College senior recently appointed captain in the cadet corps, was one of the seven men selected to represent Fort McClellan, ROTC Training Camp, at the National Pistol and Rifle Matches to be held at Camp Perry, Ohio, the latter part of August.

The National Matches are held every year at Camp Perry, located on Lake Erie, thirty miles east of Toledo, Ohio, for the purpose of stimulating interest in marksmanship as well as for instruction. Approximately 3,000 competitors from all sections of the United States attend this camp.

## SENIOR PLATOON ONE AREA'S BEST UNITS

### Drill Unit Noted Throughout South For Fancy Maneuvers

The outstanding feature of the Clemson College military system, the crack Senior Platoon, is a unit composed of those Juniors of the preceding year who have sacrificed their time along with other privileges in an effort to mould a well-trained drilling platoon capable of competing with the best in the Fourth Corps Area and at the same time staging fancy drill exhibitions which have long attracted favorable comment throughout the Southeast.

Cadets for this honored organization are chosen after strict eliminations in the early spring at which time the personnel is narrowed down to a leader, two guides, and six squads. The process of elimination is continued through the camp training at Fort McClellan, Alabama, where the climax is reached when the competitive drill for the Fourth Corps Area championship is held annually. At this time the strength is reduced to four squads.

This year, led by W. R. Cheves, the platoon has staged exhibitions at four ceremonies . . . the Moonlight Parade, Military Day, Commencement Exercises, and the competitive drill for the Area championship. In the latter, the platoon repeated the sterling performances of previous years by placing second, while the fancy drill won the whole-hearted applause of the entire assembly which, without a doubt, stamps it as the best in the South.

Tentative plans for next year include trips to West Point, Athens, Atlanta, and Rock Hill.

### Company Commanders, Lieutenants, First Sergeants, Supply and Staff Listed

According to the list of appointments for the 1937-38 session which were recently released by Colonel Weeks and approved by President Sikes, T. I. Stafford of Charleston will be Regimental Commander of the Second Regiment. His Regimental Executive will be B. S. Jordan of Wadley, Ga., who will hold the rank of Lieutenant Colonel.

The Regimental staff will be composed of R. R. McGee, Adjutant; K. N. Vickery, Chaplain; R. R. Fickling, Sergeant Major; and W. B. Zeigler and F. E. Culvern, Color Sergeants.

CADET COLONEL STAFFORD

#### Battalion Commanders

A. W. Taylor, Lieutenant Colonel, has been appointed commander of the First Battalion, Second Regiment with the following staff: H. G. Stokes, Executive; J. W. Parker, Adjutant; and T. R. Bainbridge, Sergeant Major.

Commander of the Second Battalion, Second Regiment is Lieutenant Colonel B. N. Skardon. His staff is composed of H. B. Risher, Executive; T. E. Richardson, Adjutant; and H. L. Beach, Sergeant Major.

#### Company Rosters

The following has been announced as the company rosters:

A-2—R. W. Robinson, Commander; J. U. Prichett, Executive; T. M. Hoefler and W. W. Harris, Platoon Leaders; T. W. Talbert, First Sergeant, and J. McMillan, Supply Sergeant.

B-2—R. V. Jackson, Commander; F. V. Harris, Executive; K. B. Dwight and W. W. Rush, Platoon Leaders; D. M. Hutchinson, First Sergeant, and H. J. McAlhany, Supply Sergeant.

C-2—A. S. Sanders, Commander; J. Barnes, Executive; C. Mayne and R. M. Reynolds, Platoon Leaders; H. P. Troy, First Sergeant and R. J. Ferree, Supply Sergeant.

D-2—(Day cadet company)

H. Geisberg, Commander; J. N.

(Continued on page twelve)

# 172 Clemson Cadets Attend ROTC Camp At Ft McClellan

## FLORIDA GATORS WIN ANNUAL FIELD MEET; CLEMSON IS FOURTH

### Clemson Cadets Make Fine Showing In Field Day At Fort McClellan

As the outstanding feature of the Annual Field Meet held at Fort McClellan on July 5, the final event of an interesting program was the fancy drill by the Clemson platoon under the leadership of W. R. Cheves. The performance of the many startling maneuvers of the platoon kept the eager crowd in suspense for more than twenty minutes.

#### Florida Wins

The University of Florida was proclaimed winner of the meet by virtue of accumulating a higher total of points in the various events staged during the day. Clemson finished in fourth place.

The Clemson machine gun crew composed of H. D. Byrd, C. H. Cooler, and S. O. Hoffman placed first in the stripping and mounting of the infantry weapon in record time.

Clemson's representatives in the tent pitching contest, J. M. Gantt and W. R. Cheves, were awarded first place with the fast time of 5:31 for pitching a pup tent and displaying full field equipment.

The crack drill unit from The Citadel took first place in the close order drill competition, followed closely by the Clemson platoon. Davidson was awarded third place. More than fifteen hundred witnessed the field meet this summer, including hundreds of trainees, officers, and citizens of Anniston and nearby towns.

### HOLTZENDORFF IS HOST TO CLEMSON LEADERS

As an added feature to the program at Fort McClellan this summer, P. B. Holtzendorff, General Secretary of the local Young Men's Christian Association, accompanied by A. C. Payne, president of the Clemson YMCA, visited the Clemson students attending camp at McClellan and had as his guests a few of the outstanding leaders of the rising senior class as well as visitors from the other schools.

Among the students attending the buffet supper given by Holtzendorff were the members of the senior military staff appointed during the commencement exercises in June, the members of the YMCA cabinet appointed for next year, and Y leaders from the other colleges.

Bratton Williams, '25, is now boss weaver at the Toxaway Mills in Anderson, S. C.

Above is pictured a cross-section of the active life of a trainee at the R.O.T.C. Camp, Fort McClellan, Alabama. Upper left is a view of a typical company street where the cadets have their living quarters. In the upper right hand corner is a picture of the crack Clemson College platoon during the strenuous Fourth Corps Area competition to determine the best drill outfits. In the lower left is a scene showing some of the trainees receiving instructions with the 37 mm gun. In the lower right is a shot of the cadets preparing for night maneuvers.

## CLEMSON DELEGATION HAS MOST TRAINEES

### 172 Clemson Cadets Finish ROTC Training at Fort McClellan, Alabama

The Reserve Officers Training Corps camp held at Fort McClellan, Alabama, came to a close officially on July 17, two days earlier than originally scheduled, ending one of the most successful camps in the history of the ROTC.

#### Clemson Sends 172

As the trainees finished their enrollment this summer statistics showed that this was one of the largest groups of college students to ever attend the camp at McClellan, the number running well over the eight hundred mark. Of the twenty-five colleges and prep schools represented, Clemson College had the largest delegation totaling 172 at the close of the training period.

#### Army Personnel

Representing the local Military Department at Fort McClellan this summer were four members of the Army Staff stationed here. Major R. F. Walther served as a company commander and a machine gun instructor. Major D. E. Barnett served as a supply officer. Sergeants H. S. Heath and K. R. Helton served as first sergeants and supply sergeants, respectively.

## Tigers Runner-up For Balfour Cup

### Florida Wins Trophy; Tiger Boxers Finish First In Annual Tourney

Winning first place in the boxing tournament along with thirds in the swimming and tennis meets, the Clemson athletic representatives made a very creditable showing at the annual summer encampment held at Fort McClellan, Alabama, recently to finish second to the University of Florida for the Balfour trophy, awarded to the school making the best all round athletic record.

#### Boxers Shine

With Russ Waters and Bill Dukes leading the assault, the Bengal pugilists, four strong, entered the boxing tourney as a dark horse, but the final round found three of the four still battling for honors. Dukes was the first to emerge victorious by winning the lightweight crown on a decision. After a hectic struggle which required an extra round before the judges could come to a verdict, Bob Jones, Tiger welterweight, lost out to Sorrell of N. C. State. Waters, senior welterweight, won over Connor of Florida by a TKO in the second round.

#### Farmer Wins

Dick Farmer, with two third places to his credit, placed the Clemson swimmers to a third place position in the swimming meet. Farmer placed in both the 50 and 100-yard free style. Jack Oliver finished third in the 200-yard swim.

Led by Bill Mitchell, the Bengal racquetters garnered sufficient points to tie with Florida in the tennis warfare.

## ROSENKRANS STUDIES BOTANY SPECIMENS

Professor D. B. Rosenkrans of the Botany and Bacteriology Department is making a botanical study of the varieties of cotton for the U. S. Department of Agriculture during July and August. There are hundreds of variety names for cotton, though it is quite evident that the number of actual varieties is not so great. The purpose of the study is to determine if there are botanical differences between the varieties and to classify them in such a way that a variety can be recognized by workers in different sections.

Professor A. B. Credle, of the Electrical Engineering Department, is taking advanced work at Cornell University.

## CAMP TROPHIES ARE PRESENTED AT FINAL PARADE FORMATION

### Clemson Makes The Best Record In Many Years At ROTC Camp

During the final formal formation of the camp period at Fort McClellan this year, the 1937 Reserve Officers Training Corps camp awards were delivered to the representatives and individuals.

#### Presbyterians Win

The Fourth Corps Area General Proficiency Cup was awarded Presbyterian College for its outstanding work in all events during the camp period. The Presbyterian School was also the winner of the Anniston Disciplinary Trophy as a result of its students being recognized as those having demonstrated the best behavior and cooperation. Clemson finished eighth in the proficiency record and tenth in the disciplinary contest, surpassing the ranking of the school in previous years.

#### Wins Swimming

Members of the N. C. State swimming team, headed by Payne, won first place in the swimming meet and received the swimming trophy. Clemson placed third in the aquatic contests.

#### Florida Wins Balfour

The University of Florida was announced as winner of the Balfour Trophy for having the best all-round athletic record during the encampment, closely followed by Clemson.

In addition to the trophies awarded to the different organizations, medals were awarded to the deserving individuals in boxing, swimming, tennis, baseball, and rifle marksmanship. A. R. Waters and W. W. Dukes were recipients of boxing charms. R. J. Farmer and J. H. Oliver received swimming medals, and A. J. Folger and C. F. Gibson were awarded charms for having been members of the winning company baseball team.

## WILSON INSTRUCTS IN VOCATIONAL GUIDANCE

During the Summer School which has just closed a program in training coordinators of diversified occupations was conducted by C. M. Wilson, State Supervisor of Industrial Education. A number of communities in this state are initiating a program in this field when the expanded program in Industrial Education becomes effective.

Mr. Wilson also had a rather large class in Vocational Guidance. With the added interest in guidance that is evident, vocational teachers will be called upon to serve as guidance workers.

## CLEMSON COLLEGE ALUMNI CORPORATION COMPOSED OF FIVE THOUSAND MEMBERS

Twenty-two Different States  
Represented At Meeting  
Here In June

### WOODWARD SECRETARY

The Clemson College Alumni Corporation is composed of former Clemson men, numbering nearly 5,000 scattered throughout the United States and in some foreign countries. At the last annual meeting held this past June at the college, there were alumni present from twenty-two different states, ranging from New York on the east to California on the west; Boston, Massachusetts on the north, and Florida and Mississippi on the south. The alumni Corporation is made up of Alumni Chapters, there being at present chapters in the following cities:

Washington, D. C., New York City, Philadelphia, Pa., Pittsburgh, Pa., Charlotte, N. C., Raleigh, N. C., Burlington, N. C., Asheville, N. C., Atlanta, Ga., Savannah, Ga., Augusta, Ga., Charleston, S. C., Orangeburg, S. C., Aiken, S. C., Columbia, S. C., Florence, S. C., Bennettsville, Dillon, S. C., Winnsboro, S. C., Chester, S. C., Spartanburg, S. C., Greenville, S. C., Anderson, S. C., Laurens, S. C., Greenwood, S. C., Clemson, S. C., Richmond, Va.

The Alumni Corporation is divided into twelve districts and the following are the Directors from each district:

District 1, C. N. Gigniliat, Seneca, S. C.; District 2, W. K. Livingston, Greenville, S. C.; District 3, R. E. Bass, Rock Hill, S. C.; District 4, Col. G. A. Hanvey, Abbeville, S. C.; District 5, J. W. McClure, Sumter S. C.; District 6, O. P. Lightsey, Hampton, S. C.; District 7, William Schirmer, Charleston, S. C.; District 8, J. T. Lazarr, Florence, S. C.; District 9, R. H. Fike, Atlanta, Ga.; District 10, Frank J. Jervey, Washington, D. C.; District 11, Dr. J. C. Miller, Baton Rouge, La.; District 12, T. Roy Reid, Little Rock, Ark.

There are three Directors elected at large, including T. W. Thornhill, Charleston, S. C.; R. Brice Waters, Columbia, S. C. and Louis Balentine, Greenville S. C.

The Officers of the Corporation are as follows: President, J. T. Lazarr, Florence, S. C.; First Vice-President, Louis Balentine, Greenville, S. C.; Second Vice-President, Frank J. Jervey, Washington, D. C.; Secretary and Treasurer, J. H. Woodward, Clemson, S. C.

The objects of the Alumni Corporation are to foster the interest of the college in any way possible and to work for the mutual benefit of its members. Any information desired should be requested of the Secretary of the Corporation at the College.

### ATHLETIC DIRECTOR

Head Coach Jess Neely who has placed Clemson's athletic department on a sound financial basis and made Clemson's football teams respected throughout the southeast.

## CHURCHES PLAY PART IN LIFE OF STUDENTS

### Episcopal, Methodist, Baptist, Presbyterian, Catholic Churches Here

When a Freshman enters college, it is true he has started a "new lap" in the game of life. He leaves home; he is away from parental guidance; he is in a totally different environment. But on the other hand, there are some influences which follow him. His Church is one of these. There are five churches which have been erected here at Clemson, in large part by the members of the different denominations throughout the state, to serve the students of Clemson while they are here at college. Student interests and programs are kept to the fore. Student meetings are held each week and are conducted by students in collaboration with the resident ministers and church members from the faculty. The programs are adapted to the life interests of college men.

The five campus churches are as follows:

Episcopalian, Rev. Donald Veale.  
Methodist, Rev. H. O. Chambers.  
Baptist, Rev. J. K. Goode.  
Presbyterian, Dr. Sydney Crouch.  
Roman Catholic, Father Spelman, of Anderson.

## EXPERIMENT STATION AT CLEMSON COLLEGE HELPS RURAL PEOPLE

### Duties and Accomplishments Of State Research Work Are Outlined

Agricultural research work is one of the important functions of Clemson College. The work is carried on by the experiment station at Clemson and at its branches, the Sandhill Experiment Station, near Columbia, the Pee Dee Station, at Florence, the Truck Station, at Charleston, the Coast Station, at Summerville, and the newly established Edisto Experiment Station, in Barnwell County.

Since farming is the chief industry in South Carolina it is important that every effort be made to overcome the agricultural problems which constantly arise to hinder crop production. It is the function of the experiment station to investigate these problems and to show how they may best be met. To do this involves studies of soil cultural methods, fertilizers, varieties, insects, diseases, livestock breeding, feeding and management of livestock, and the economic and social status of rural people.

During 50 years of service to the farmers of South Carolina, the experiment station has shown the way to many improvements in crop production which have helped to advance the state agriculturally. With new facilities at Clemson College and at some of the branch stations, the outlook for effective research work is better than ever before.

One of the important advances made by the experiment station during the past few years has been the gaining of a better understanding of the soils of the state. This knowledge is basic to all other work relating to crop production.

With the establishment of the Edisto Experiment Station in Barnwell County each of the various types of farming areas in the state with the exception of the lower Piedmont has an experiment station to help work out its agricultural problems.

Because of more adequate equipment and other facilities the research work at Clemson is of a technical as well as of a practical character. Technical investigations of soils, plant physiology, of the breeding of both plants and animals, of diseases and insects attacking both plants and animals and studies along many other lines are being carried on along with experiments in the practical production of corn, cotton and other crops.

W. C. Dozier, '34, is connected with the International Harvester Company in Charlotte, North Carolina.

## CLEMSON COLLEGE IPTAY CLUB GROWING DAILY AS NUMBER NEARS FIVE HUNDRED

### COLLEGE REGISTRAR

Mr. G. E. Metz, Clemson's Registrar who keeps the college's routine working in smooth order. It is his duty to advise the students with their courses and to supervise the keeping of such college records as the number of cuts a student takes and his scholastic standing.

### Alumni And Friends Requested to Write for Iptay Information

#### MEMBERSHIP DRIVE

The Clemson College Iptay Club, one of the most successful undertakings to be endeavored by Clemson alumni in recent years, is receiving a favorable reception wherever there are Clemson men.

A secret organization, conceived by a group of Clemson Alumni in Atlanta nearly three years ago and perpetuated by the enthusiasm of its members and the excellent work it is doing, the Iptay club gives every indication of growing into one of the most powerful influences that has ever been introduced at Clemson.

Growing daily, the Iptay Club membership has increased to a total of nearly five hundred members and has set as its goal a total of one thousand members before the end of 1937. Iptay Lairs, as local chapters are called are springing up overnight in all sections of the country. Members are listed as far north as Toronto, Canada; as far south as Orlando, Florida; as far west as Berkeley, California; and as far abroad as Paris, France.

Exceptionally active membership is by no means centered in the large cities. While such places as Greenville, Columbia, Charleston, Atlanta, Savannah, Washington and Clemson are naturally leading the list in active members, such localities as St. Matthews, Orangeburg, Greenwood, Great Falls, Union and numerous other towns are unusually interested. Charlotte, Spartanburg, Anderson and other such cities are gradually becoming more and more active.

Strangely enough, active membership in the Iptay club is not limited to former Clemson students and graduates. In a number of cases interested friends of Clemson have inquired about the Iptay club and approved of the plan sufficiently to desire membership.

Clemson men and Clemson friends who are interested in the Clemson Iptay club and interested in organizing a lair in their community are invited to write to: Clemson Iptay Club, Box B, Clemson, S. C., for information relative to Iptay.

## ROGERS APPOINTED EXPERIMENT HEAD

### Member Of Agronomy Staff Chosen Superintendent Of Edisto Station

Effective July 1, W. B. Rogers, who for a number of years has been a member of the staff of the department of Agronomy, was made superintendent of the Edisto Experiment Station in Barnwell County. Provision for the establishment of this station was made last year by the General Assembly. Its purpose is chiefly to carry on investigational work with asparagus, cucumbers, cantaloupes, and watermelons.

Mr. Rogers as a member of the Agronomy staff had ample opportunity to become familiar with the agricultural work of the state and is well fitted to assume his duties as superintendent of this station, a station which should eventually develop into one of the best sub-stations in the state.

# 1937 FOOTBALL PROSPECTS BRIGHT

## FROM THE PRESS BOX

With the toughest schedule in Clemson's football history before them, approximately fifty aspiring gridiron gladiators will assemble on Riggs Field September 1, where they will receive the attention of Head Coach Jess Neely who, in turn, will attempt to mould an aggregation strong enough to cope with each opposing eleven as it looms in the path of the Bengal Tiger, headed for greater football laurels.

### Prospects

With an ample supply of lettermen available, it is very probable that a veteran team will take the field in the season's opener against Presbyterian College here on September 18. Taking a glance down the roster, we will endeavor to formulate our mythical starting line-up. First, we will place steady Tom McConnell at one of the wings along with Gus Goins, who attained fame with his ability to snatch aerial heaves last fall. At the tackle posts, it seems as if two huskies, Fred Wyse and Curtiss Pennington—will get the call to be flanked by two aggressive guards, Oliver Payne and Bill Bryant. At this time may we say that we think and firmly believe that we have the two best centers in the South in Captain Harold Lewis and Charlie Woods. There is only a shade's difference between the two—both have their potentialities, but it is likely that Lewis will take charge of the team from this assignment.

### In The Backfield

Alternate captain Al Sanders is firmly entrenched at the blocking back position, and will attend to "Backing up the line" along with pivot man Lewis. Bob Bailey, who flashed to the forefront as a brilliant runner and kicker during the latter part of last season, has the edge on the quarterbacks. Husky, speedy Don Willis is due for a great year this fall, and he will probably get the call to arms with Red Pearson at the half-backs. Red is a fiery, dependable player and is slated for much service during the ensuing campaign. Other backs who come in for mention are: Chad Bryant, the same shifty sophomore who evaded would-be tacklers during the spring sessions to score gobbs of touchdowns; Dusty Wiles, who has been a main cog in the Neely offense the past two years and Watson Magee, a sophomore sensation last season and who is primed for another big time at ball-toting. Other warriors who come in are such stalwarts as Banks McFadden, whose freshman playing stamps him as the greatest pass receiver Clemson has had since the days of Bob Jones, Simmons, Ruby, Embody, Payne, Segars, and Okurowski.

### Suicide Schedule

Not even the thoughts of the injury jinx that robbed Coach Neely of the services of Henry Woodward in 1934—Randy Hinson in 1935 and Streak Lawton in 1936—has dampened the hopes of Jess Neely as he looks forward to the future wars with a gleam in his usual peaceful eyes. After P. C. comes Tulane, West Point, Georgia, Wake Forest, South Carolina, Georgia Tech, Florida, and then Furman. "This fall will either make or break us," says Jess, who has placed Clemson sports on a par with the best in the South since his arrival on the campus a few years back. His dreams have been realized this year when he has a schedule that should fulfill the ambitions of any football mentor, and now it remains for his hopefuls to pull the Bengal colors through to the peak he has strived to reach. A coach must have the cooperation of all of his men before he may hope

### BLOCKING BACK

Al Sanders of Camden, S. C., who will serve as alternate captain of Jess Neely's fighting Bengals this fall. Sanders, who made his name as a blocking back is one of the most versatile performers Clemson will put on the field next year. In addition to his fine blocking, he is an excellent defensive player and a consistent punter.

### TOM BROWN CHOSEN COACH AT CATAWBA

Tom Brown, former Bengal star athlete has been appointed assistant coach and instructor in physical education at Catawba College, Salisbury, N. C., it was learned here recently.

Brown, since his graduation, has been line coach and physical director at Charlotte High School. Announcement of his Catawba appointment was made by Dr. Howard R. Omwake, president.

Tom will be remembered as a sterling performer on the gridiron and hardwood, receiving Southern conference recognition in both during his playing career, as well as All-American mention in football. He is a native of Cross City, Florida.

H. E. Miller, Bengal football tackle, has been serving as a life guard at Boscobel Lake during the summer months.

to successfully pass the many barriers in the path of such a "murderers row". We feel free to add that the Tiger footballers have even better spirit than of last year, and feel assured that Coach Neely may depend on every man to back him to the limit no matter how bad the hardships may be.

## BENGAL GRIDSTERS TO APPEAR IN SOUTHEAST

### Grid Schedule Calls For Games Throughout The Eastern States

Since Head Coach Jess Neely took over the football reins at Clemson in 1931 the most appropriate slogan that the Tigers could adopt would have been the age-old "Join the Tigers and see the world." It might, however, be more fitting to advocate joining the Tigers and seeing Eastern America.

Clemson's schedules have changed greatly since that never-to-be-forgotten depression year of 1931. With Neely at the helm, the Bengals have moved gradually but definitely away from the buses of South Carolina and onto the great railway systems that connect the major towns sprinkling this side of our great nation.

Football games that have called for the appearance of Neely-coached Clemson teams in such cities as Atlanta, Washington, Lexington (Kentucky), Charlotte, Durham, Raleigh, and Tuscaloosa (Alabama) have been yearly occurrences. During the coming football season the Clemson team will go on display in New Orleans, against Tulane; at West Point, against the Army; at Athens, against the University of Georgia; and in Gainesville against the University of Florida. These games will be played in addition to the games with Presbyterian College and Wake Forest at Clemson; Georgia Tech in Atlanta; South Carolina in Columbia; and Furman in Greenville.

Clemson is rapidly becoming definitely recognized among the better football teams of this section as a team anxious to play first-class football against top-notch opposition, and as a team of good students, gentlemanly young men, and gallantly fighting football players.

Sept. 18—Presbyterian College at Clemson

Sept. 25—Tulane University in New Orleans

Oct. 2—The Army at West Point

Oct. 9—University of Georgia in Athens

Oct. 21—University of South Carolina in Columbia

Oct. 30—Wake Forest at Clemson

Nov. 6—Georgia Tech in Atlanta

Nov. 13—University of Florida in Gainesville

Nov. 25—Furman University in Greenville (Thanksgiving)

## Kitchens Elected '38 Track Captain

### Joyner Named Alternate Captain; Huff Chosen Team Manager

Ed Kitchens of Laurens was elected to head the 1938 Bengal track team at a meeting held prior to the closing of school for the summer. N. P. Joyner from Ward was chosen as alternate captain. J. R. Huff was selected as manager of the squad.

Kitchens, who has made a name for himself both in basketball and track, is Coach Frank Howard's star quarter-miler and succeeds Bob Carter as captain. Joyner, a miler, has been a potential cog for the past two seasons and is destined to do even better next spring.

P. W. Bethea of Greenville succeeds W. Folk as manager of the Clemson boxing team. Bethea has served capably as a junior manager for the past two years.

Al Folger, Tiger baseballer, was a member of the winning baseball team at Fort McClellan, Alabama. C. F. Gibson was also a member of the winning club.

## GRIDIRON MATERIAL FOR 1937 DISCUSSED BY JOE SHERMAN

### FOOTBALL CAPTAIN

Captain Harold Lewis, Clemson's fast-charging center, who will lead the Bengals through what is perhaps the toughest schedule in Tiger history. Lewis, a native of Mullins, stamped himself as one of the South's finest centers with his superlative playing in Clemson's victory over Georgia Tech last fall.

### Publicity Manager Discusses Prospective Grid Stars of This Fall

By Joe Sherman

The replacement of three regular backfield performers, two ends, a guard, and a tackle constitutes the main problem facing Coach Jess Neely and his Clemson coaching aides as the 1937 football season nears its inauguration on September first.

A total of seven first-string lettermen were eliminated from the Bengal varsity by graduation last June and all but fourteen monogram wearers will return to camp when the practice campaign gets under way this year.

Their work completed and exceptionally well done, Captain Joe Berry, half-back Mac Folger and quarterback Winston "Streak" Lawton have romped in the Clemson backfield for the last time. Manuel Black and Henry Segars, tackle and guard, have likewise departed via the graduation route as have veteran ends Don Shuford and Sam McConnell. Segars, with another year of football eligibility, will be able to play this fall if he returns to school.

Led by Captain Harold Lewis, outstanding center from Mullins, and Al Sanders, steady-going and exceptionally dependable alternate captain and back from Camden, the Clemson team this year goes against nine outstanding opponents in P. C., Tulane, the Army, Georgia, South Carolina, Wake Forest, Georgia Tech, Florida and Furman.

From end to end and on thru the backfield Coach Neely will have a capable outfit that, man for man, should be able to make a favorable impression on the Southern football public despite the high calibre of the schedule. The reserve strength, however, is a problem that is particularly acute at this time. Boiled down to a simmering point, the 1937 team at this time stacks up as a good first team, with several outstanding performers, but weak on reserve strength.

In the exact center of the line for example, the Bengals will be favored by two brilliant performers in Captain Harold Lewis and letterman Charlie Woods. Both are dependable offensive men and fine line-backing performers defensively. It will be their secondary defensive excellence, coupled with that of Al Sanders and a well-knitted forward wall that should make ground-gaining over the Tigers a comparatively difficult proposition.

Moving inward from the ends and standing prominently among the better linesmen of this section are tackles Fred Wyse, a stalwart veteran of two strenuous campaigns, and Curtis Pennington, a junior who turned in some very fine work last fall as a sophomore.

The veteran ends are Tom McConnell and Gus Goins. McConnell will see a great deal of service within the next four months.

The Clemson backfield, always as much of a puzzle at Clemson this time of year as in some two hundred football playing institutions in the country, looms as a huge question mark on the horizon. On hand will be six lettermen, five reserves of last year and a half-dozen or more ambitious freshmen candidates.

Alternate Captain Al Sanders, one of the most versatile performers in the lot, will undoubtedly be in one of the positions, lending his brilliant defense, his consistent kicking, blocking, ball carrying and general excellence of team play and cooperation to the cause.

Don Willis, a powerful full-back who turned in several promising exhibitions last year and continued the improvement thru spring practice, is being depended upon for much service as are Watson Magee, Bob Bailey, Ben Pearson and Bill Wiles.

## RICE MAKES CHANNEL SWIM AT COLUMBIA

### Clemson Grad Completes 40 Day Swim in Record Time to Win Event

After 40 days of swimming Clarence W. Rice, Jr., former Clemson basketball player and swimmer, landed in "Dover England" after completing the 20 miles across the "English Channel."

According to a recent article in the Columbia State, Rice, who is a resident of the Columbia, South Carolina YMCA and an employee of the state highway department, was the winner of this unique endurance swim staged in the Y pool, beginning on May 26 and ending July 20. Each swimmer was allowed to swim a total distance of not more than half a mile a day, 44 lengths of the pool. Rice, a dark horse, started a few days late but managed to catch up with the field and continued daily swimming until he completed the "channel" trip.

### BEN CANTEY TO EDIT TIGER SPORTS PAGE

With this issue of the Tiger a new Sports Editor, Ben Cantey, takes over the responsibility of editing the sporting features of your campus weekly, succeeding Bob Lominack who has been in office the past few months.

Cantey is a junior from Sumter and has been serving on the Sports staff the past semester.

### ROVING REPORTER RELATES TALE OF BUILDING PROGRAM

(Continued from page one)

we journeyed over the Library where we were awed by the chaotic appearance of the usually peaceful interior—Carpenters and painters literally overran the retreat, and we stayed only long enough to smudge some of the paint.

Feeling quite proud of our tour of discovery, we called it a day and headed for home, but even the march of time had found its way into our little sanctum, leaving bits of wall plaster scattered over our bunk, floor, typewriter, etc., sufficient evidence of the spinkler-installation crew that has been on the rampage throughout the barracks of late.

## COMMANDANT'S OFFICE ANNOUNCES CADET MILITARY APPOINTMENTS FOR NEXT YEAR

(Continued from page one)

the following promotions and assignments for the school year 1937-38 are announced:

To be Captain: Bagnal, F. W. (Brigade Adjutant).

TO BE CAPTAIN: Bagnal, F. W. (Brigade Adjutant)

TO BE CAPTAINS: (Company Commanders)

B-1 Ray, E. C.  
C-1 Ruff, W. H.  
D-1 Ambrose, J. R.  
E-1 Peden, T. E.  
F-1 Dunn, W. E.  
G-1 Todd, W. P.  
H-1 Morgan, J. W.  
A-2 Robinson, R. W.  
B-2 Jackson, R. V.  
C-2 Sanders, A. S.  
D-2 Geisberg, H.  
E-2 Hickey, W. E.  
F-2 Oliver, J. H.  
G-2 Paulsen, G. C.  
H-2 Gibson, C. F.  
Band Murray, R. M.

TO BE CAPTAINS: (Staff)

Waters, A. R., 1st Regiment Adj.

McGee, R. R., 2nd Regiment Adj.

Riddle, J. H., Ex. 1st Bn., 1st Reg.

Aichele, F. J., Ex. 1st Bn. 2nd Reg.

Risher, H. B., Ex. 2nd Bn. 2nd Reg.

Adams, J. W., Brigade Chaplain

TO BE FIRST LIEUTENANTS: (Staff)

Gantt, J. M., Adj., 1st Bn., 1st Reg.

Saverance, C. R., Adj., 2nd Bn., 1st Reg.

Parker, J. W., Adj., 1st Bn., 2nd Reg.

Richardson, T. E., Adj., 2nd Bn., 2nd Reg.

Shelley, J. C., 1st Reg. Chaplain

Vickery, K. N., 2nd Reg. Chaplain

TO BE FIRST LIEUTENANTS: (Company Executives)

B-1 Wilkinson, J. C.  
C-1 Cooler, C. H.  
D-1 Stanley, T. E.  
E-1 Bethea, P. W.  
F-1 Huff, J. R.  
G-1 Byrd, H. D.  
H-1 Morgan, O. F.  
A-2 Pritchett, J. U.  
B-2 Harris, F. V.  
C-2 Barnes, J.  
D-2 King, J. N.  
E-2 Davis, J. W.  
F-2 McKeown, C. M.  
G-2 Marshall, J. D.  
H-2 Settle, J. L.

Band Director, Green, H. C.

Band Chapman, J. K.

TO BE FIRST LIEUTENANTS: (Platoon Leaders)

B-1 Eatmon, T. W.  
B-1 Richardson, D.  
C-1 Culpepper, J. M.  
C-1 Huff, W. D.  
D-1 Gregorie, W. D.  
D-1 Hoffman, S. O.  
E-1 Abercrombie, P. R.  
E-1 Bobo, F. E.  
F-1 Jones, R. J.  
F-1 Seawell, J. T.  
G-1 Lytton, C. B.  
G-1 McKinney, H. H.  
H-1 Lane, M.  
H-1 Lawrence, R. E.  
A-2 Hoefer, T. M.  
A-2 Harriss, W. W.  
B-2 Dwight, K. B.  
B-2 Rush, W. W.  
C-2 Mayne, C.  
C-2 Reynolds, R. M.  
D-2 Clayton, D. B.  
D-2 Graham, L. V.  
E-2 Gill, W. T.  
E-2 Martin, R. W.  
F-2 Schirmer, C. C.  
F-2 Shell, J. C.  
G-2 Ferguson, S. A.  
G-2 Josey, D. K.  
H-2 Disher, J. H.  
H-2 Smith, E. H.

To Be Master Sergeants

Baskin, J. S.—Brigade Sergeant Major

Pregnall, A. H.—Regimental Sergeant Major (1st Regt)

Fickling, R. B.—Regimental Sergeant Major (2nd Regt)

To Be Staff Sergeants

Waters, G. C.—Bn. Sergeant Major (1st Bn. 1st Regt)

Cook, J. C.—Bn. Sergeant Major (2nd Bn. 1st Regt)

Bainbridge, T. R.—Bn. Sergeant Major (1st Bn. 2nd Regt)

Beach, H. L.—Bn. Sergeant Major (2nd Bn. 2nd Regt)

To Be Color Sergeants

Commander, G. C. (1st Regt)

Calhoun, F. H. H. (1st Regt)

Zeigler, W. B. (2nd Regt)

Culvern, F. E. (2nd Regt)

### To Be First Sergeants

Woods, C. (B-1)  
Covington, H. M. (C-1)  
Shepherd, E. W. (D-1)  
Sweeny, J. O. (E-1)  
Moore, J. B. (F-1)  
Hughes, F. (G-1)  
Garick, L. T. (H-1)  
Talbert, T. W. (A-2)  
Hutchinson, D. M. (B-2)  
Troy, H. P. (C-2)  
Bookhart, H. U. (D-2)  
Guess, J. H. (E-2)  
Covington, J. C. (F-2)  
Brailsford, J. F. (G-2)  
Carlson, P. (H-2)  
Horner, L. C. (Band)

### To Be Supply Sergeants

Salvo, G. C. (B-1)  
Vaughan, C. L. (C-1)  
Drew, P. N. (D-1)  
Heatwole, T. H. (E-1)  
Cox, W. T. (F-1)  
Page, G. D. (G-1)  
Hughes, D. G. (H-1)  
McMillan, J. (A-2)  
McAlhany, H. J. (B-2)  
Ferre, R. J. (C-2)
